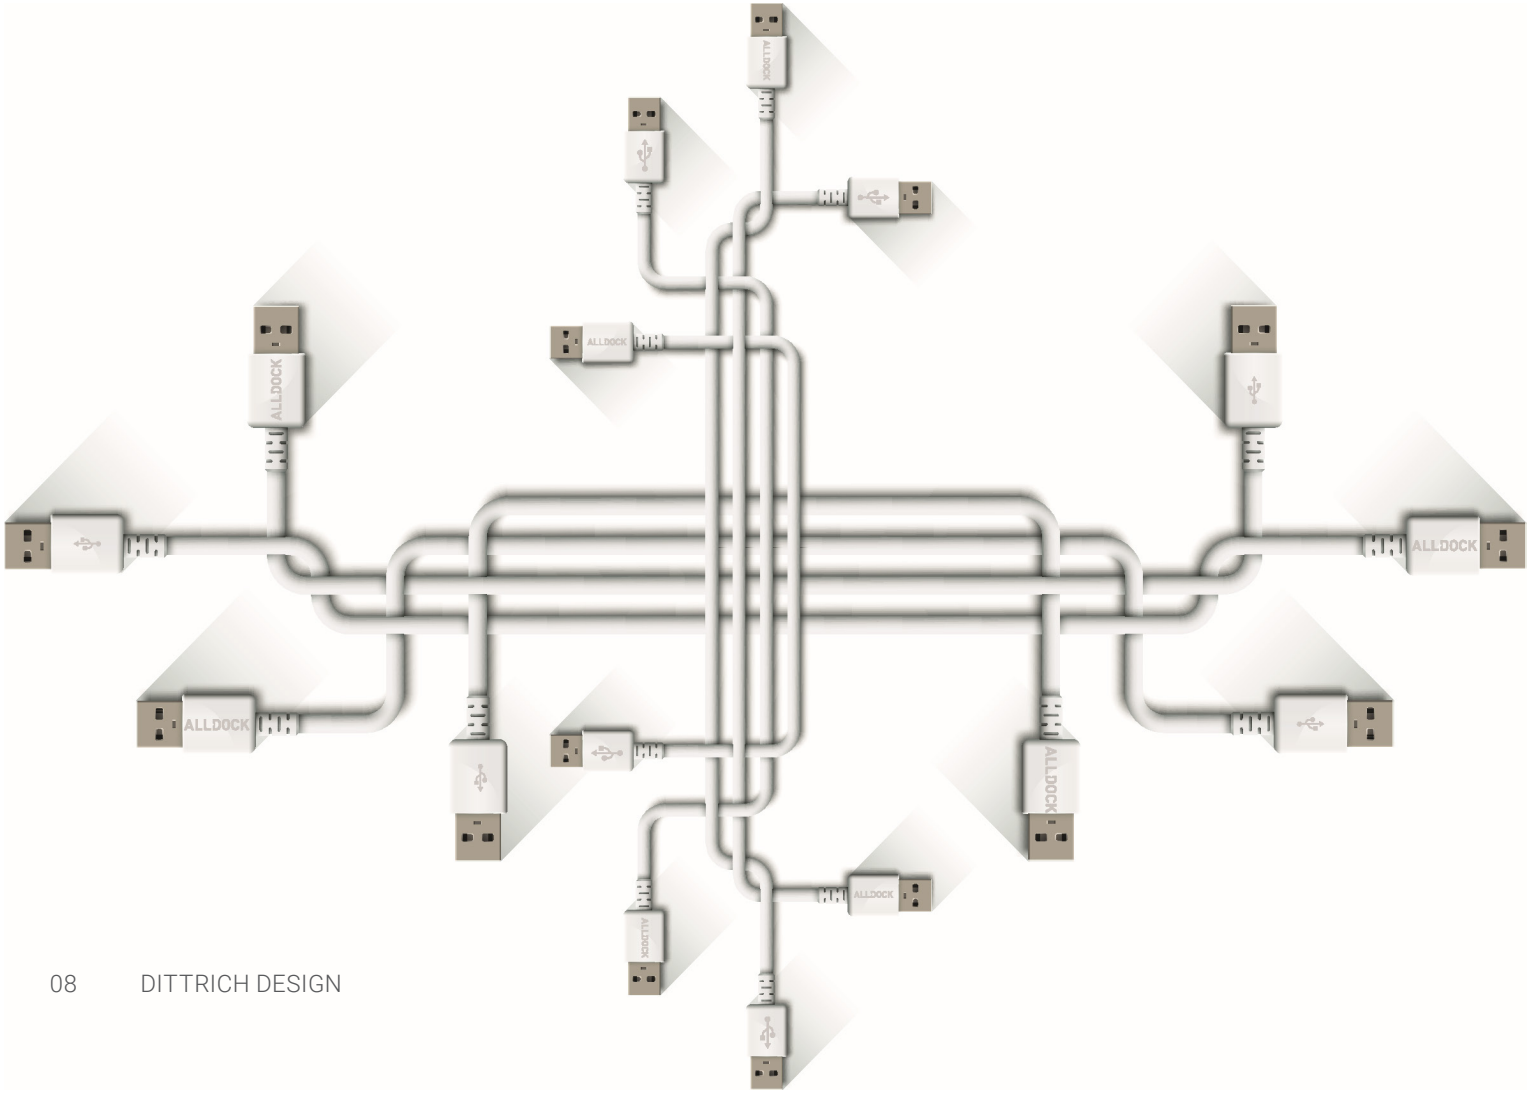
KLEMENS DITTRICH
Founder and Proprietor of Dittrich Design

HISTORY

“My enthusiasm for elegant but functional design has driven me on since the 80s and has not left me alone since then.”

TEAM

“One team. One passion. So we have been able to develop something which satisfies the highest demands on design, functionality and performance.”



ALLDOCK

PERFORMANCE

“The architecture of the USB charger developed especially for us enables a constant powerful performance on all four, six or eight USB connections.”

ABS . **COMPONENT**

“Due to a special surface treatment,
the materials used by us are both visually
and tactilely refined.”

WOOD . **COMPONENT**

“The woods selected by us, which are bamboo and walnut, fit harmoniously or deliberately contrast into their surroundings and are at the forefront in the matter of sustainability.”

ALLDOCK

VIEW

“We believe there are more important things in life
than searching for a free socket or the charging cable,
or the irritation with an unattractive
mess of cables.”

ALLDOCK
DESIGNED TO CHARGE
ALLDOCK

ALLDOCK

DESIGNED TO CHARGE
