

## Z8 – A world's first: One-Touch Americano

For light, aromatic, long coffees

## Unmatched innovations

Coffee is an indulgent treat all over the world. When it comes to creating coffee specialties, the only limit is imagination. But when it comes to the preparation, there is one thing of which everyone is certain: the easiest way is at the touch of a button – freshly ground and extracted. At JURA, there are 70 engineers pursuing the quest of ultimate coffee enjoyment, and creating components and systems for the coffee machines of tomorrow.

Driven by the vision of the ultimate coffee result, technicians create components and systems for the coffee machines of tomorrow. Software developers incorporate intelligence into electronic controllers so that even the most complex of processes can be completed at the touch of a button. Computer scientists create new operation concepts, i. e. control elements and user interfaces, and even bring additional functions to people's smartphones via apps. Quality assurance specialists constantly test components, prototypes and series production units under the toughest conditions to guarantee durability and that they retain their value. They make 3.8 million cups of coffee in the test laboratories every year for this purpose alone.

The innovations we present to you in the following pages are the result of all of us striving for perfection.

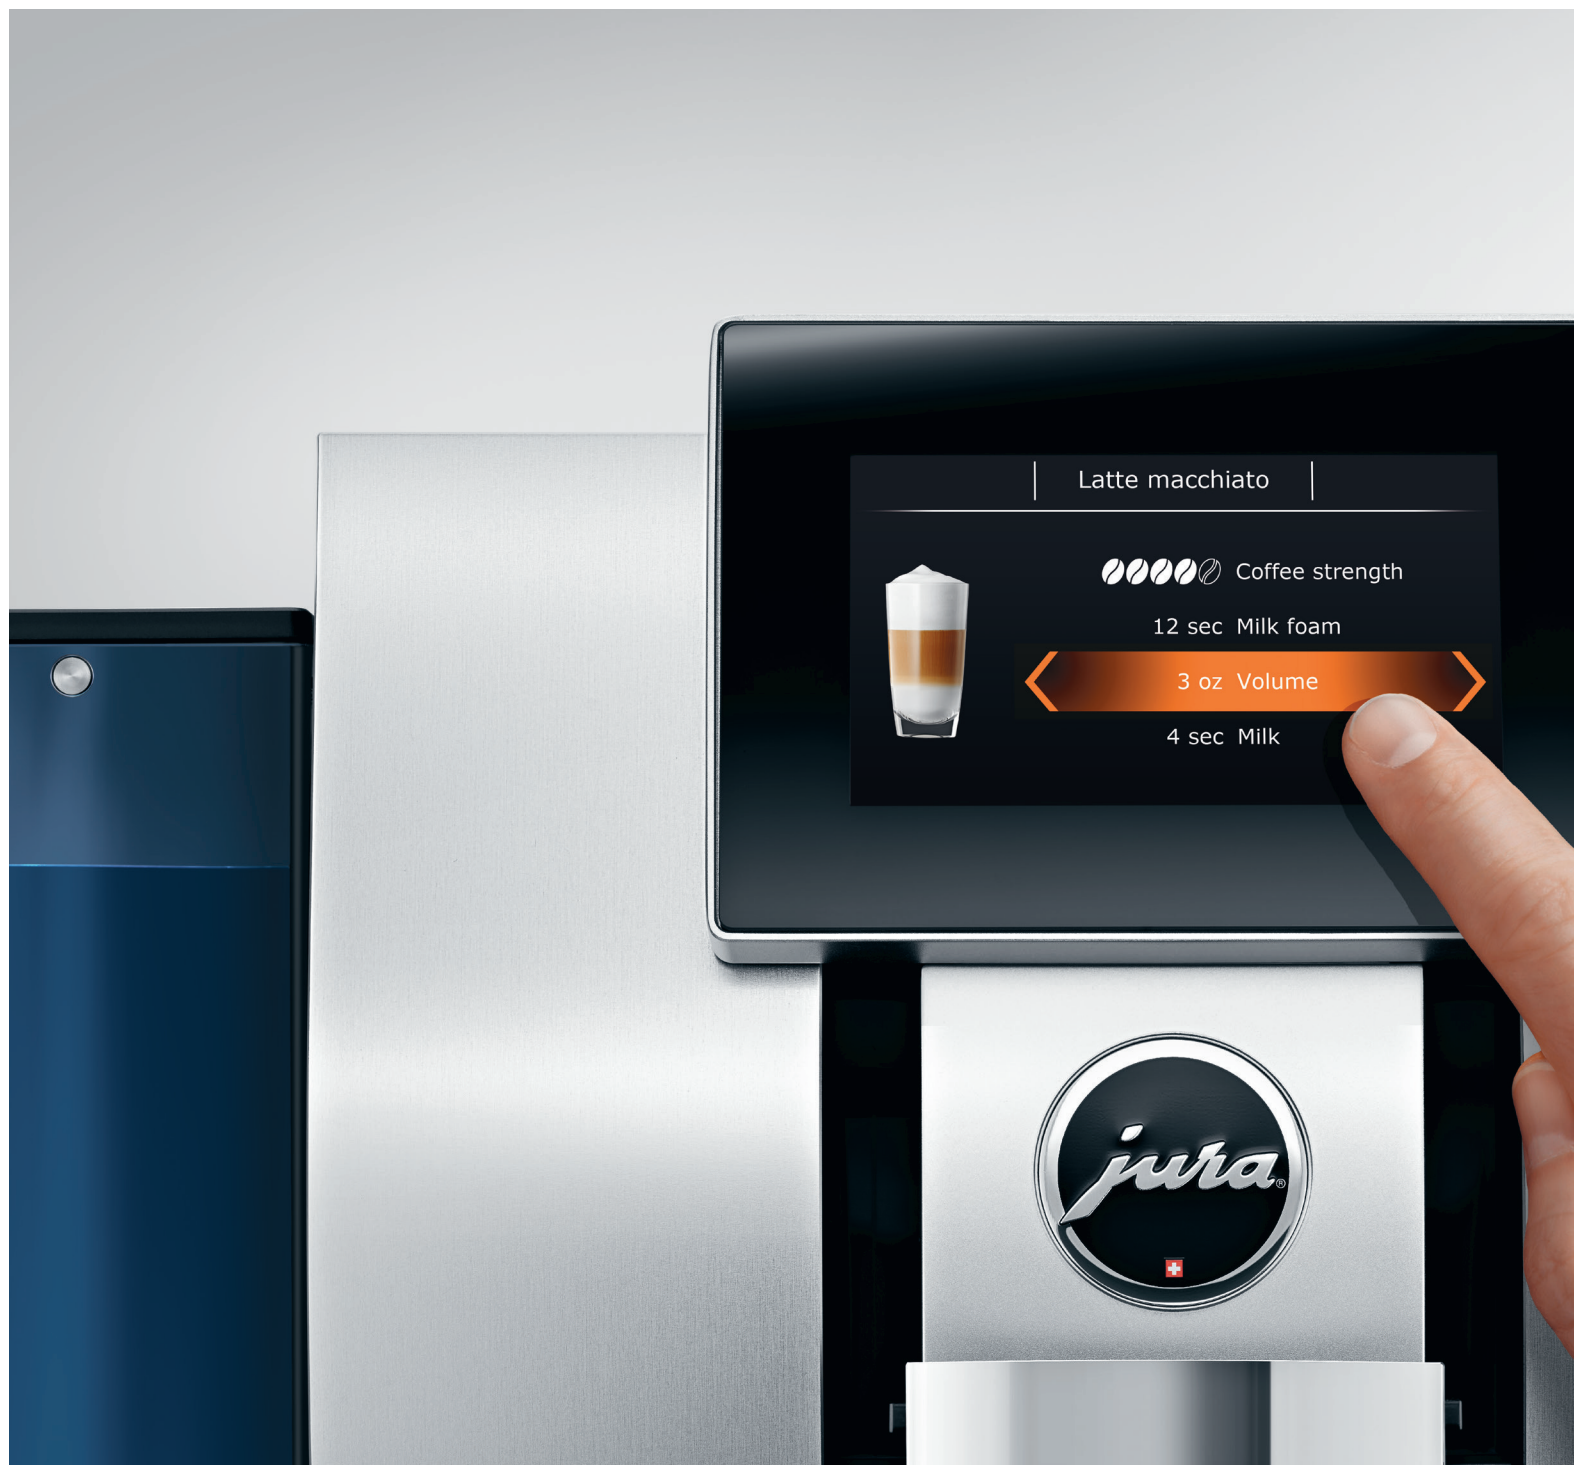

Z8

## A world's first: One-Touch Americano for light, aromatic, long coffees

Inspired by the world's best baristas, the Z8 turns enjoying a coffee into a long-lasting pleasure. For the Caffè Barista, Americano and the Jug of coffee, it uses a special preparation method that combines the coffee with hot water during the extraction process to produce full-bodied, delicate, deliciously light specialties. Creating the perfect treat for the body and soul.

Z8

## Big screen, big scene

With a precise 4.3" high-resolution touchscreen color display, JURA sets a new standard for coffee machine user interfaces. Just as impressive as its imposing screen is the completely new operating concept. It sets itself apart thanks to its clear layout and simplicity in keeping with the times. The touchscreen puts all your favorite coffees at your fingertips. By touching, swiping and selecting, you can individually program, name and arrange your specialties on the display. Equipped with Smart Connect, the Z8 can also be controlled via J.O.E.®.

Z8

## An unprecedented range of specialties

Coffee classics – characteristically full-bodied and aromatic. Trend specialties topped with light and airy milk foam, imaginative and delicious. The Z8 makes a statement for variety and choice. 16 different specialties can be selected by simply touching the start screen, and a total of 21 beverages are available via the Rotary Selection. What's more, there's still plenty of scope for coming up with personalized creations and names – let coffee fire the imagination. Two pumps and two heating systems allow the coffee and milk to be prepared in parallel, rediscovering the classic Caffè latte. The Z8 also fully satisfies the high demands of tea lovers by providing the ideal water temperatures for green and black tea.

# Z8

## A world's first: One-Touch Americano for light, aromatic, long coffees

The Z8 from JURA boasts an unbeatable standard of coffee. For long coffees, the world's first automatic coffee machine for the home with One-Touch Americano function uses a special preparation method that combines the coffee with hot water during the extraction process, resulting in full-bodied, deliciously light specialties. The Pulse Extraction Process (P.E.P.®) facilitates the superb development of flavor for ristretto and espresso, with trend specialties like flat white and latte macchiato being prepared to perfection thanks to automatic switchover from milk to milk foam. Operation and the selection of one of the 21 different specialties takes place intuitively, thanks to self-explanatory graphics on a high-resolution 4.3" touchscreen color display. If desired, Smart Connect even enables the machine to be controlled via J.O.E.®. And thanks to RFID technology, the CLEARYL Smart water filter is detected automatically.

### Benefits at a glance

- One-Touch Americano function for light, aromatic, long specialties
- Parallel preparation of coffee and milk for a perfect Caffé latte result
- 4.3" high-resolution touchscreen color display with sophisticated operating concept for intuitive navigation
- Ultimate coffee quality thanks to the Aroma<sup>G3</sup> grinder and Pulse Extraction Process (P.E.P.®)

SWISS  MADE

## Technical overview

Number of specialties	21
One-Touch Americano function	■
Intelligent Water System (I.W.S.®)	■
Compatible with J.O.E.®	■
Wireless ready	■
Smart Connect included	■
Pulse Extraction Process (P.E.P.®)	■
Grinder	Multi-level Aroma G3 grinder
Thermoblock heating system	2
Milk system	HP3
JURA hygiene: TÜV-certified	■
CLEARYL filter cartridge	CLEARYL Smart
Customize and duplicate products	■
Display	4.3" touchscreen color display
Height- and width-adjustable dual spout	3.2 – 6 in / 0.8 – 2 in
Water tank capacity	81 oz
Bean container capacity	10 oz
Voltage / power	120 V~ / 1500 W
Weight	30 lbs
Dimensions (W×H×D)	12.6×14.9×17.7 in
Article number / color	15192 / Aluminum
