TO-GO WARE®

The Beginning

A Note From Andy Keller

In early 2004, I took a trip to the local landfill after spending the day landscaping my backyard. I was horrified by how many single-use bags filled the scene. Plastic bags blanketed the landscape in a thin mix of white and beige plastic.

On my way home, I continued to notice plastic bags everywhere; caught in trees and on fence posts, half drowned in gutter puddles and blowing in the streets like urban tumbleweeds. I vowed to stop using single-use bags for good. Inspired, I dropped a few bucks on a secondhand sewing machine and began sewing what would ultimately become the first ChicoBag® brand reusable bag.

Andy Keller

Commitment To The Environment

We understand that there is always more we can do to help kick the single-use disposable habit. That's why we have instituted a number of programs designed to make our business cleaner and our planet healthier. Our zero-waste programs showcase the importance of recycling, repurposing, and alternative transportation. Through these programs, we have significantly reduced our impact and inspired others to do the same.

Our Mission

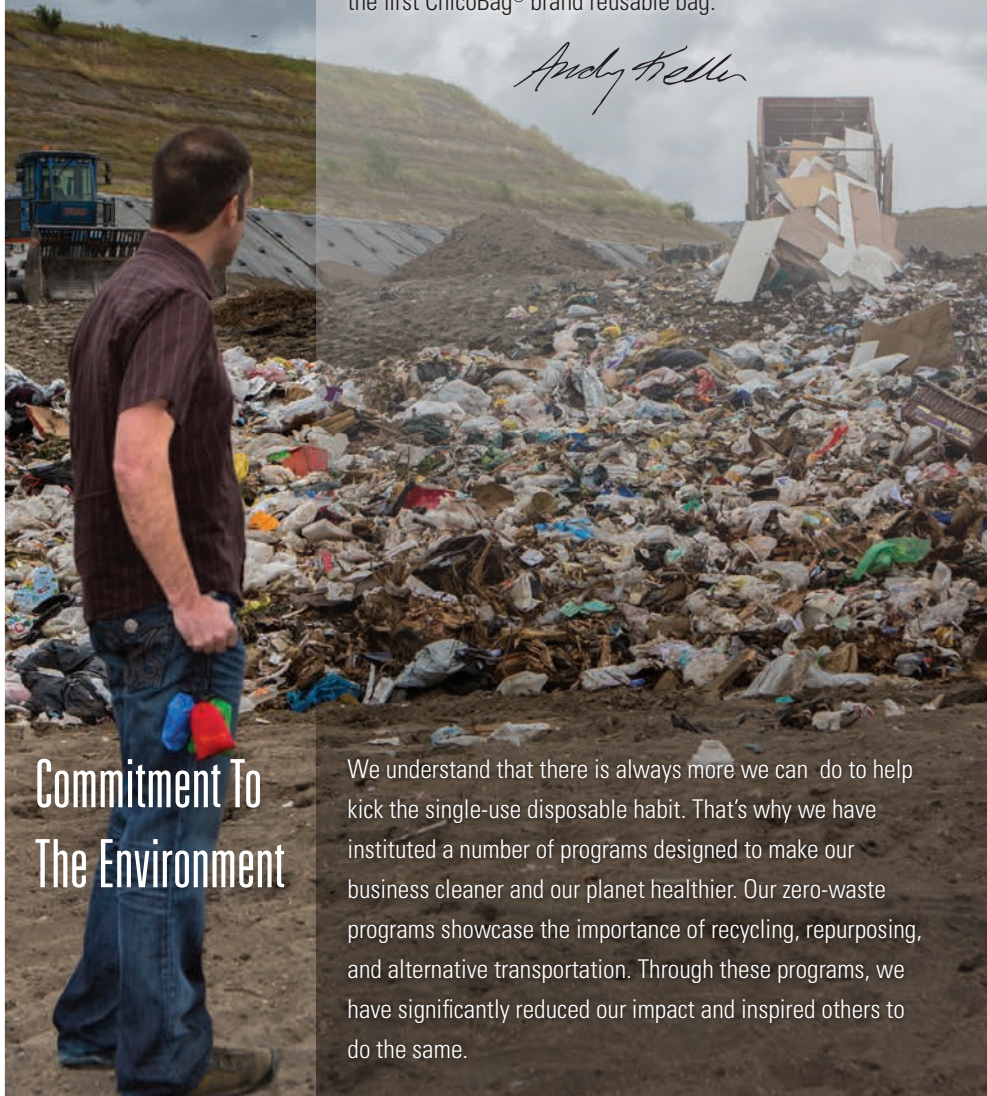

At ChicoBag® and To-Go Ware® our mission is to help humanity bag the single-use habit. In other words, the wasteful, throw-away habit that overflows our landfills and clogs our oceans. We advocate for waste reduction; we design and sell the highest quality reusable products.

We partner with organizations, businesses, and schools who share our mission by co-branding quality reusable alternatives to single-use waste. Our products empower people to take an active role in solving the single-use problem. At ChicoBag, we make bagging the single-use habit easy.

How We Do Business

Our status as a certified B Corporation shows our commitment to doing business the right way. Taking that a step further, we are a Green America approved business and uphold Fair Labor Association standards throughout our supply chain.

REUSABLE BAGS & TOTES THAT STUFF INTO A BUILT-IN POUCH!

"The bags worked out great for our event!... I overheard lots of people say 'Oh, this is a ChicoBag! This is so nice!' and, 'Wow, they got ChicoBags!' ChicoBag has developed a great reputation and is highly coveted in the reusable bag world. We chose to use ChicoBag because [the products] are very sturdy, they roll up into their own tiny pouch, and the mini carabiner is so convenient." - Molly Medeiros, City of San Jose

Power Of Business
To Solve Social
& Economical
Problems

WHAT IS rePETe™?

rePETe™ is a trademarked term we use to identify products made from recycled materials. All ChicoBag rePETe products contain fabric certified by Repreve® to be made from 100% post-consumer recycled plastic bottles. In addition to the fabric, many rePETe products have other recycled components like carabiners, cording, and cord locks.

A materials statement that lists each component used in production is printed on the inside of the bag, back of the pouch, or both. ChicoBag believes in transparency, and our rePETe products align with this core value.

OUR TESTING PROCESS

ChicoBag is a leader in upholding rigorous product testing standards to keep you and your family safe. Every production run is tested for lead contamination and other heavy metals through third-party testing facilities. We adhere to testing standards more stringent than those set forth by the Consumer Product Safety Improvement Act (CPSIA). In addition to the CPSIA standards, we also adhere to the more stringent standards for children's toys set forth in ASTM F963-07.

Regulations vary by state, so ChicoBag products are also tested quarterly to comply with the Toxics in Packaging Legislation currently adopted by nineteen states. This means we not only test our bags for Lead, but also for Cadmium, Hexavalent Chromium, and Mercury.

LIGHT MY FIRE CUSTOM REUSABLE SPORK

• 4 week lead time • 250 unit minimum • \$75 Set-Up Fee

Custom sporks by Light My Fire are an item that your customers will use again and again. An ingenious fork-spoon-knife combo that is a sturdy alternative to single-use cutlery.
