14 Colors To Choose From

The Capitano® is unique because of its special elongated spiral. The pitch (distance between the twists) has been increased for easy, more positive insertion into the cork. The nickel plated spirals have the filet grooved line, running down the spiral which cuts into the cork more quickly. Non-stick coated spiral is a smooth, non-filet version made in France. Capitano corkscrews are 5-3/8" long by 1" Wide. Serrated blade.

CORK BOSS™
WAITER'S CORKSCREW

new
3115

**THE ROTO HANDLE
SOMMELIER'S NEW BEST FRIEND!**

BIGGEST INNOVATION
IN WAITER'S CORKSCREWS IN 30 YEARS!

**Strong Aluminum Body,
Other Parts Are Stainless Steel.**

3115 Cork Boss™ Waiter's Corkscrew

Here's the latest innovation in a waiter's corkscrew: Cork Boss™. It makes insertion into the cork very fast and easy. It quickly removes the cork from the spiral afterwards. The most time consuming exercise with a waiter-type corkscrew is inserting the spiral into the cork. Now it's rapid and easy. Strong aluminum body, other parts are stainless steel. Patent Pending. 5-3/8" long, 5/8" wide.
Pkg. Code: BXR   Imprint area: 2" X 5/16". Laser Engraved.

IMPORTANT PHYSICAL ADVANTAGE
OF THE CORK BOSS™

Perfect for individuals who have limited strength with their hands.

For waiters or sommeliers opening 20 to 40 bottles in an evening. Cork Boss™ transfers the twisting torque of the wrist away to the operator's hand, arm and shoulder. This can alleviate wrist pain, inflammation and possibly even carpal tunnel syndrome.

The Roto handle's easy-turn metal sleeve makes it effortless to insert the spiral into the cork.

Avoid Wrist-Pain and possibly even Carpal Tunnel!

Instructions on how to use:

Step 1. Insert one-turn of the spiral into cork. Lift Roto handle.

Step 2. Turn the Cork Boss™ clockwise using only the Roto handle until the spiral is inserted into the cork. Leaving a half turn exposed of the spiral.

Step 3. Fold down the Roto handle and extract the cork with the two-step lever.

Step 4. When finished, lift up the Roto handle, grip the cork in your hand and spin it off the spiral.

Ahh Super!™ Two-Prong Cork Extractors

This category addresses particularly difficult corks as well as perfectly normal corks. Extraction is very easy. The "difficult" corks are usually older corks that are showing signs of crumbling. To remove cork: Ease the twin blades down on both sides of the cork by rocking the handle back and forth until the blades are all the way down. Twist clockwise and pull upward to remove the cork. Some key features:

● **Full extraction or partial is possible**

● **You can re-cork the bottle**

● **Cap lifter located on top of the metal handle units**

Great For:

- **Wine Bottling Lines**
- **Winery Laboratories**
- **Hotels**
- **Restaurants**

The ElectroParagon replaces its predecessor, Electropull and Electropull Focus. Electropull was a successful line for more than a decade until the producer retired and closed production. (We will continue to furnish OEM component parts and service for existing ElectroPull units.)

THE NEW ELECTROPARAGON™

ElectroParagon™ is the result of years of research and engineering. It sells at a better price than Electropull and has a simpler modular construction. The line consists of three (3) options:

4012 ElectroParagon™ Electric Uncorking Machine (Wall Mount)

ElectroParagon is a Heavy-Duty Electric Uncorking Machine that can extract 500 corks an hour, with little effort reducing labor costs dramatically!! This is the wall-mount unit as shown in Figure 1. This unit has wall mounting hardware included. It stands 21-3/4" H, 5-1/2" wide and 7-1/2" deep. The unit weighs 16 lbs. Pkg. Code: BX

Figure 2

4013 Table Stand Base For ElectroParagon™ Electric Uncorking Machine (see page 63).

The 4012 unit mounts on this stand to allow for a counter or tabletop installation. Hardware is included for mounting the wall-mount unit on top. It stands 17-1/2" H. and 9-1/2" wide and 10-5/8 at the base. The unit weighs 14 lbs. Pkg. Code: BX

4014SET ElectroParagon™ Electric Uncorking Machine With Table Stand Base (Stand Included In Price)

This combines the 4012 ElectroParagon™ and the 4013 ElectroParagon™ Table Stand with a savings in price over buying each separately. Shown in Figure 2. The combined unit stands 38" H and weighs 29 lbs. Ships in two cartons. Brief assembly required. Pkg. Code: BX

To Operate :

Place a bottle, with capsule removed, into the cradle. This automatically triggers the downward movement of the spiral into the cork. It then continues to extract the cork (remove the bottle at this time). The spiral then goes up and expels the cork and the cork falls from the machine.

This is an indispensable accessory when you need to remove a lot of corks in a short period of time with the ElectroParagon™. The efficient Cork-Catcher Bag consists of two parts: (1) the top apron which attaches to the ElectroParagon™ unit and (2) the bag itself. The bag is attached to the upper apron with snaps (behind the red band). When the bag is full, a pull string cloth top casing comes up over the corks to seal them in the bag. The detached bag can then be removed without the risk of corks spilling everywhere. The bag will hold up to 600 corks. The unit utilizes laminated PVC and polyester materials in its construction. Measurements: top apron, 11-1/2" x 20"; bag itself, 10-1/4" x 7-7/8" x 22"; overall total unit height, 39-3/4".

One winery-packaging specialist in California comments.

"In just two months, we uncorked over 50,000 bottles using the ElectroPull® and its performance was flawless. We also used it in our lab when performing microanalysis and opened bottles with all types of corks. Not only is the ElectroPull® fast and efficient, but I believe it will reduce injuries associated with uncorking motions. It definitely has a place in any wine bottling department."

FRANMARA Exclusive

It has a unique 2.7 mm hardened stainless steel open spiral. This worm has no difficulty with hard agglomerate or plastic corks. Machine will shut down if hard object (other than wine bottle) is placed in cradle. Re-starts in 30 seconds.

new 4019

The latest in an electric professional uncorking machine. Sleek new design. Comes with a built-in stand. Extracts 500 Corks per hour. Exclusive Partial Extraction Feature!

The function is much the same as the ElectroParagon™ with certain added features. This newly designed unit integrates features from the original ElectroPull® plus more. Those added features are:

1.5"   1"

- **Partial Extraction:** A sliding up-and-down gauge allows at "Min" the extracting of just 1" of the cork from the bottle. At the Medium (half-way point) adjustment only 1-1/2" of the cork is extracted. At the bottom of the gauge ("Max") complete extraction takes place. These partial extractions are great for pre-opening many bottles in advance for large dinner parties or gatherings without exposing the wine to air.

- **Bottle Counter:** Enables counting bottles opened on a digital screen. Easily resets when needed.

- **Worm Replacement Kit:** All the tools needed for replacing the worm are located in a compartment in the lower left of the machine near the base. The kit contains two (2) spare replacement spirals, two (large and small) Allen wrenches and a spare fuse.

- **Foil Cutter:** A foil cutter is located in a compartment in the lower right of the machine near the base.

- **Machine Specifications:** Measures: 39-3/4" tall, 7-1/4" wide, 7" deep, weight: 25.4 lbs. 24V DC upper and lower motor. Power: 200W. Electrical Range: 110V-240V AC, 50-60Hz.

Clef du Vin®
Wine Enhancers

The Clef du Vin® is completely safe and effective because nothing is introduced into the wine - The wine simply reacts to the embedded metals and ages in moments instead of years! Simply pour yourself a glass of wine, dip the Clef du Vin® into the glass, taste and compare results. Re-dip the Clef du Vin® at one second intervals until the wine reaches the phase you enjoy the most. Important to keep your dips at 1 or 2 seconds each, so as to not over-age the wine.

Decantus Deluxe

DECANTUS™

A UNIQUE, BY-THE-GLASS WINE DECANTING SYSTEM

Get greater Value and Enjoyment from your next bottle of wine with DECANTUS.™

Wine needs to react with air to reveal its fullest flavor and bouquet

The DECANTUS™ utilizes the Bernoulli (a Swiss scientist) effect where the reduced pressure of a stream of fluid (wine) draws an air flow through diagonal thin tubes inside the DECANTUS™. The wider opening on top and larger liquid capacity of the top reservoir bowl makes pouring into DECANTUS™ much easier than with the Vinturi. Wine travels faster through the DECANTUS™ without a whirlpool effect, because of the vertical planar insert. Reduces free sulphites an average of 56%* (see www.decantus.net). The "froth" from DECANTUS™ has finer bubbles giving smoother aeration than any other aerator on the market. Made with FDA approved materials.
