Leifheit AG is one of the leading European suppliers of housewares products, headquartered in Nassau, Germany. Established in 1959, they today employ 1800 people in 40 countries and operate 10 production facilities.

In 1959, Ingeborg and Günter Leifheit founded the company Günter Leifheit KG in Nassau, Germany, for the purpose of producing carpet sweepers and floor wipers.

From the very outset, Leifheit focused on product concept as well as product benefits. At Leifheit, engineering, ergonomics and quality have always formed an aesthetic unit, leading to creative problem solutions that make everyday life easier. This is precisely why Leifheit embraces the tag line, "always a better idea."

Since 1984, Leifheit has been a public limited company listed on the stock market. With its well-known brands Soehnle and LEIFHEIT, as well as its French subsidiaries Birambeau and Herby, Leifheit numbers among the leading European suppliers of household products. A broad selection of bathroom textiles and accessories under the brands of Kleine Wolke, Meusch, and Spirella round off the company's range of production and sales activities.

With half a century of innovation history, German-based Leifheit is widely known and admired in Europe for its well-designed, moderately priced food prep products (cooking, baking, and serving tools; canning items; kitchen storage and organization; etc.); insulated hot/cold beverage carafes; cleaning devices (floor wipers, sweepers, brushes, window cleaners, etc.); laundry drying racks; and esteemed Soehnle kitchen and bath scales.

Today, Household Essentials® is the exclusive distributor of Leifheit and Soehnle products in North America. We Offer a broad selection of Leifheit products that can be combined on one order with products from Household Essentials® and shipped from the Household Essentials® distribution facility in Hazelwood, MO. Both Leifheit and Household Essentials® are open to expanding the product offerings displayed in this brochure. Contact us for more information or with questions you may have.

# Ironing and Air Drying

AirBoard ironing boards are made with an extra light ironing surface that is durable and long-lasting. In combination with Leifheit's Thermoreflect technology covers, which are specially designed for heat and steam, and the boards' sturdy, lightweight frames, AirBoards form a complete system for a truly superior ironing experience.

1

## Unbelievably light!

AirBoards are up to 50% lighter (and sometimes more) than comparable boards. AirBoards are easy to lift, carry, set up, and take down. There is nothing unwieldy about a Leifheit AirBoard. It's featherweight you have to lift to believe.

2

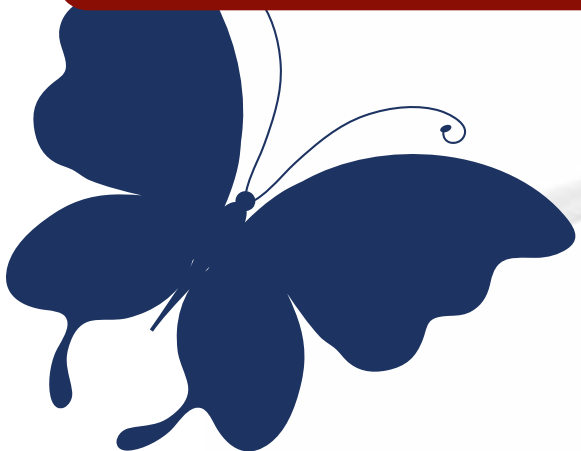

## Up to 33% faster ironing!

Between the specialty ironing surface and the Thermoreflect cover, heat and steam distributes more evenly and effectively. The Thermoreflect cover even bounces heat back! This means faster—and easier—ironing.

3

## Sturdy and stable!

AirBoards' legs are specially designed to compensate for uneven floors. Their unique mounting creates an evening ironing surface almost anywhere for safer, steadier ironing.

# Xtra CLEAN

Dry Floor Cleaning  
With X-bristles for better, faster sweeping

Xtra CLEAN Brooms have a unique bristle arrangement that sweeps better and faster than conventional brooms. The bristles are arranged in rows of narrow Xs. This crisscrossed arrangement acts as a dirt barrier to catch and trap debris and dirt—even fine dirt. This innovative design means less sweeping because each stroke catches more. That means more time for other things.

## COMPARISONS

### Natural vs Synthetic Bristles

#### Natural Mixture Bristles

1. Natural bristles are gentler on flooring
2. Ideal for wood and parquet

#### Synthetic Elaston Bristles

1. Plastic bristles are strong and durable
2. Ideal for tile, stone, and outdoor sweeping
3. Water-proof

### Straight vs Curved

#### Straight

1. Classic shape for familiar sweeping

#### Curved

1. Sickle shape collects debris and dirt in the middle of the broom
2. Less debris and dirt falls off the edge of the broom, so fewer repeat stroke

CLICK  
SYSTEM

1. Broom heads work with all Click System handles
2. Slanted handle position allows the entire surface of the broom to stay in contact with the floor while sweeping
3. Soft bristles, especially the natural bristles, protect furniture from scuff and scrapes
