

Constructed with energy-return foam used in GelPro's Newlife Comfort Mats, the **Complete Comfort[™] Seat Cushion** is extra-supportive so your weight is properly dispersed while sitting. This ergonomic chair cushion eliminates uncomfortable pressure and restores energy during prolonged periods of sitting. Unlike inexpensive memory foam cushions, the Complete Comfort[™] Seat Cushion is **made with molded high-density foam with bounce-back memory and comfortable support**. This cushioned chair pad is the perfect comfort solution for those who suffer from coccyx issues, lumbar strain, sciatica and degenerative disc disorders.

These stylish in-door, high-density foam seat cushions fit most dining and kitchen chairs and have a durable, stain-resistant top surface that wipes clean with soap and water. Our unique slip-resistant bottom keeps the ergonomic chair cushion in place without the use of cumbersome ties.

Make any hard chair comfortable instantly!
