

CBD HEAT PACK™

herbal concepts

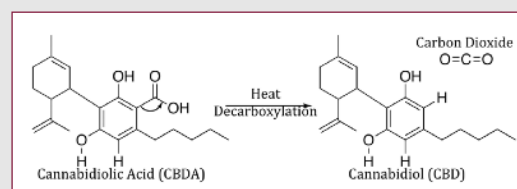

Herbal Concepts has been creating innovative, natural pain relief alternatives to balance physical, mental and emotional well-being since 1996. As an industry leader in handcrafted, hot & cold aromatherapy packs, we are continuing to grow and elevate our products as we explore the use of CBD as an integral component in our aromatherapy packs.

Herbal Concepts has applied for a United States patent on the delivery of CBD's by combining dried hemp plant material, flaxseed and microwave heat, in the form of a microwavable aromatherapy pack.

Cannabidiol or CBD is all the rage, commonly found in lotions, creams, oils, vaporizers, tinctures and edibles, but what is CBD? CBD is the non-psychoactive healing compound found in the cannabis plant. Decarboxylation is the process of adding heat to convert cannabidiolic acid (CBDA) in dried hemp to useful CBD. CBD can be a powerful treatment for common issues including anxiety, insomnia, and chronic pain in both humans and animals. The CBD Heat Pack will allow CBD to be absorbed through the skin and breathed in through the lungs.

Herbal Concepts has developed a full product line of CBD Heat Packs using this new technology. CBD Heat Packs are thoughtfully designed, utilizing sustainable, recycled hemp fabric and eco-friendly packaging. **Relax Better. Relax Naturally.**
