

The Smart Wine Aerator, *by Aveine*

Price: \$449

AVEINE this is...

- A Smart Wine Aerator
- The 1st wine aerator connected in the world
- The New Wine Experience
- Each wine, perfectly aerated in an instant, every time.
- A patented technology
- Born and imagined in France

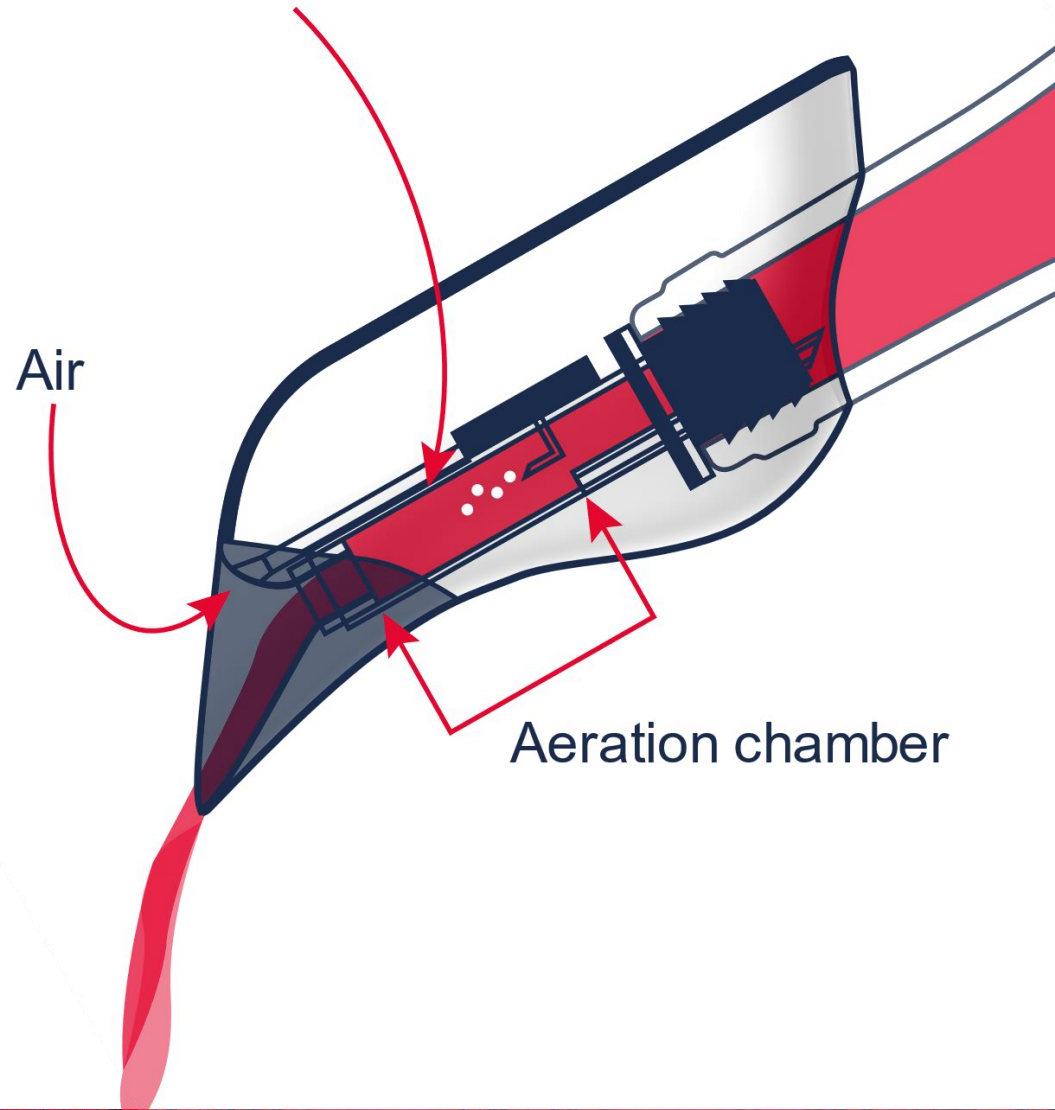

What exactly is going on?

How does it work, technically?

When you pour the wine into the glass through the device, ambient air is injected into the flow, more or less depending on the selected time. When you set the aerator to 6 hours, the aerator **reproduces the aeration of the wine**, exactly as if you had left the bottle uncorked for 6 hours.

The difference is that
1/You have **the same result instantly**
2/Only the wine that passes through the unit at the time of serving is aerated. What remains in the bottle is intact. So if you want to **experiment with different aerations**, or if you think the wine is too much or too little aerated, you can set the aerator to different levels.

Wine Aeration

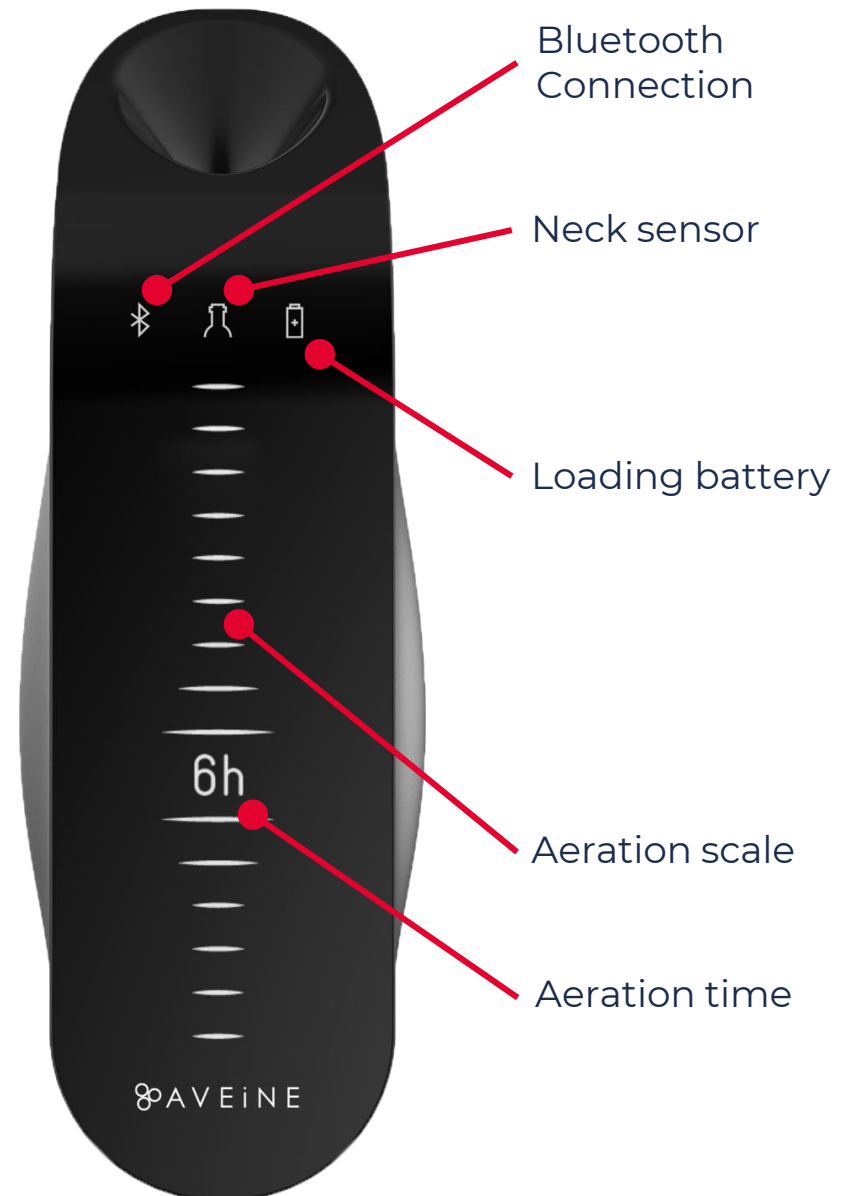

The aerator is quick and easy to handle.

Once charged, the aerator has an **operating time** outside its base of **8 hours**.

Once **connected** with your application, the **Bluetooth** logo is displayed.

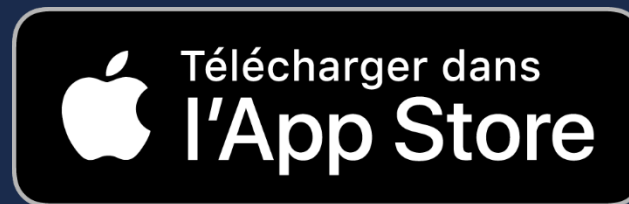

When the aerator is **correctly positioned**, a neck-shaped logo is displayed.

The screen is **touch-sensitive** and allows you to set the aerator from **0 to 24-hour scale** in 15 steps.

The mobile application Aveine

Completely free, the application is available in French and English in 41 countries on Apple and Google stores.

Why AVEINE ?

- **Nomad** : The aerator is a rather small object which allows to carry it easily (in its pouch) and to share an experience
- **Unique** : No other device offers the same features on the market.
- **No additional costs or chemicals.** There are no cartridges or vials to buy. Ventilation is said to be natural because it uses ambient air
- Advanced **patented and certified technology.**
- **Works with 95% of the bottles.**
- **Your customers no longer need to know about wine to enjoy an enhanced tasting experience.** Aveine is like a sommelier in your pocket.

Where to find Aveine?
