# Nail clippers for the modern era

Surgical precision for everyday living.

CLIPPERPRO

## CLIPPERPRO

was designed by a team of three orthopedic surgeons to improve and modernize the time tested basic nail clipper.

Combining our decades of experience using precision surgical instruments with

- modern design
- state of the art manufacturing
- patented, ergonomic force multiplying mechanism

*We created the ultimate nail clipper –*  
**CLIPPERPRO Omega.**

**Current nail clippers require odd uncomfortable movements of your wrist and can easily rotate or shift unexpectedly.**

These outdated clippers also require you to have a *strong squeeze* between your thumb and your pointer finger.

*Degeneration* of the joint at the base of the thumb is very common in people over the *age of 50*.

## DEMONSTRATION

These handles are derived from surgical instruments designed to be held in the palm of the hand rather than the fingertips giving users an improved grip.

- Blade rotates 180° which allows the user to place the blade in a comfortable position before clipping.
- Blade locks in place when pressure is applied to handle which ensures an accurate cut.
- The double action mechanism makes cutting your nails much easier, requiring very little strength to operate it.

## CLIPPERPRO OMEGA Select

Powder coat finish

Lower tier packaging with microfleece protective pouch and polishing cloth

● *Only color available*

**US retail price of**

\$45.00

CLIPPERPRO

## CLIPPERPRO OMEGA Elite

High gloss solid color paint or metallic paint

Middle tier packaging with microfleece protective pouch and polishing cloth

**US retail price of**

\$55.00

CLIPPERPRO

## CLIPPERPRO OMEGA Ultra

PVD finish (*pearl chrome with mat finish vs rose gold, etc.*) for handles as well as blades

Upper tier packaging with leather pouch and with a cleaning cloth

US retail price of

\$95.00

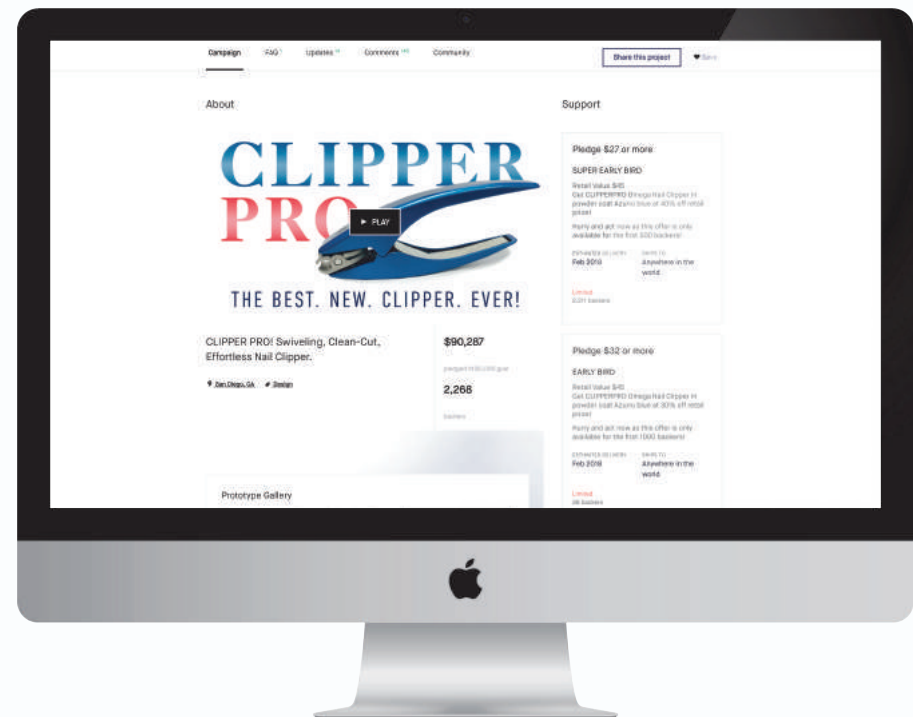

CLIPPERPRO

## KICKSTARTER

We started our KICKSTARTER campaign and met our funding goal within the first three days of launching it.

- ◻ We hit **1,805%** on our Kickstarter campaign.
- ^ Raised **\$90,287.00**.
- + Gained **2,268** backers.

CLIPPERPRO

## PROUD CONTRIBUTOR

The ANRF was the first charity that we supported during our KS campaign, and we plan on continuing to support them as well as other charitable/research entities that meet our stringent criteria of outcomes and transparency.

## COMPARISON

### CLIPPERPRO

- Uses palm based grip for more power/easier cutting
- Handle design provides inherent stability
- Blades made of Surgical grade Stainless Steel – 420
- Swiveling head allows for ergonomic positioning
- High quality construction designed to last a lifetime
- Contemporary design allows for many finish options

*The patented design was created by Orthopedic surgeons and based on a surgical instrument which costs \$750+*

### CONVENTIONAL

- Uses key pinch grip which loads thumb and index finger joints most commonly involved in degenerative arthritis
- Lever arm is easily inadvertently swiveled out of position
- Made from low carbon stamped steel which quickly loses its sharpness
- Fixed angle of blades dictates approach angle
- Cheaply manufactured and generally considered to be disposable
- Antiquated design from the late 1800s

## TESTIMONIALS

“ I finally checked my mail today to find the Clipper Pro waiting for me. I trimmed my nails recently, so I tried them on my toes and I have to say I am impressed!

*They clip and adjust effortlessly, and my nails don't need to be filed after since they clip so cleanly.*

The clippings didn't go flying all over the place either and I really wished I had picked up another pair during the Kickstarter! Fantastic product! ”

• Leslie Benson

“ Received my Clipper Pro in the Netherlands today! Got a protection sleeve as well.

*Initial impressions are very good, high quality materials and simple to use.*

Cuts very well. Thank you! ”

• Marc Van Leeuwen

“ Creator, I received my clippers Friday and I gave them to the wife and she loves them.

*They are very well built and easy to use. Thank you for a great product.*

Now how do I buy more so I can gift them to family and friends? Thanks. ”

• David Ullla

“ Received mine today. Really impressed.

*Thank you creators for a job well done!*

Did an open boxing demo video.”
