

The Nonstick Clad line has a solid foundation built from FIVE LAYERS comprised of an 18/0 magnetic stainless steel base layer, pure and alloy aluminum, finished with an 18/10 stainless steel layer with our Swiss Diamond XD Nonstick Diamond coating, making this the most prestigious line in stainless steel cookware.

The Nonstick Clad FIVE LAYER cookware line has been developed after many years of research and development. The Nonstick technology that is incorporated results in brilliant cooking performance and our patented Swiss Diamond nonstick coating results in the perfect food release every time.

The bonded layers allow the heat to be evenly distributed around the pan, removing the possibility of hot spots. These high quality products will reduce the amount of energy needed to produce your meals.
