

AD-300

AROMA DIFFUSER

DESCRIPTION:

Ultrasonic transducer vibrates at a steady and high frequency that makes the molecules of water and the essential oils so tiny that it is easily absorbed by the body. This creates the negative ions and moisturizes air & skin allowing you to enjoy the aromatherapy effectively.

- Glass design for the perfect atmosphere in any room
- in continuous mode or 4 hours in intermittent mode.
- Water capacity: 60ml
- Warm white color LED light
- Auto shut off at low water level.
- Built in overheating protection.
- Product Dimensions 3.8" x 3.8" x 5.2"
- World wide voltage 100-240V

Put water inside

Add some drops of essential oil

Power on to release a mist & fragrance, using to the essential oils to achieve all its natural benefits
