

# Eva-Dry

Damp In. Dry Out!™

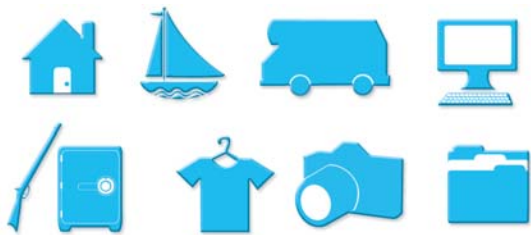

The only renewable, compact dehumidifiers that fight moisture, mildew, mold and odor in small spaces for up to 10 years.

**Captures moisture. Captivates consumers.**  
Safe, non-toxic, natural defense against moisture and mildew.

Renewable Eva-Dry dehumidifiers are filled with silica gel, a very thirsty substance. Odorless silica beads absorb many times their weight in moisture and lock it in so water can't leak or spill out.

When the Eva-Dry is “full” you renew the silica inside by plugging the unit into any power outlet. Heat gently releases water vapor in a few hours. When the indicator is blue again, Eva-Dry is renewed and ready to go back to work. You can repeat the process for up to 10 years!

**Applications.** Eva-Dry is perfect for:

	EVA-DRY	Disposable Calcium Chloride Products	
Renewable	✓ YES	NO	Es renovable
Eco-Friendly	✓ YES	NO	No daña el medio ambiente
