BAMBOO COMPRESSION SOCKS

When lounging at home, working, or out on the road, we sometimes forget to take care of the parts that actually keep us moving. Spending long hours sitting -- or even standing -- can take its toll on your body and your body's foundation, the legs and feet. Studies have shown that travelers have an increased risk of deep vein thrombosis (or DVT) and blood clots that can migrate to the lungs and lead to a pulmonary embolism.

- 1 **Promote Blood Circulation**
- 2 **Reduce Odor, Swelling, & Fatigue**
- 3 **Varicose & Spider Vein Relief**
- 4 **For Men & Women**
- 5 **Quick Drying**
- 6 **Anti-Microbial Fabric**

Our eco-friendly Bamboo Compression Socks are perfect for your weary feet and legs, helping to promote blood circulation, reduce leg and feet swelling, and eliminate fatigue. They can be used for preventative leg health and help you avoid potentially serious medical problems -- such as edema, phlebitis, and thrombosis. Made with bamboo fibers, these socks will fight germs, reduce foot odor, and absorb moisture. So give your feet a break, your legs some rest, and kick back with the socks that love to travel.

- 4 100-225 / 220-250 Volt Compatible

Everyone loves to travel, but it's easy to forget the little things you need -- especially when you are traveling overseas. The last thing many people think about is whether or not their electrical products (electric shaver, hair dryer, curling iron, camera charger, and more) will even work in other countries. Our pint-sized Universal Travel Adapter certainly solves this dilemma, and it works using both 100-225 or 220-250 volt standards (does not convert power). Not only does this all-in-one adapter save you money, but it also works in over 150 countries around the world -- including Europe, Canada, China, Russia, Mexico, Australia, and the U.S. Lightweight and compact, this travel adapter can pack away virtually anywhere to save you valuable bag space, and is the only one you'll ever need.

Measuring 16" from heel to toe, these aromatic socks are a travel essential for the plane, train, bus, or car and are the perfect toe warmers to cozy up with at

Traveling and suits simply don't mix. Ironing suits causes long term fabric damage, and steaming your suit wastes valuable time. The patent pending SuitPack has perfected the science of travelling with a suit, allowing travelers to arrive at their destination with a suit that's "ready to wear". Every curve, fold, attachment, and surface of this case has been designed to remove crease and wrinkle forming conditions -- it is the most effective suit packing system in the world. With SuitPack, you and your suit will always arrive unruffled.
