

KnifeDock™

Safely stores, organizes and protects your knives!

STORAGE TECHNOLOGIES™

**DECLUTTER
YOUR
COUNTER!**

The KnifeDock™ allows knives to be neatly stored in drawers, freeing up valuable countertop space for more productive uses. The patent pending StabSlab™ technology makes us different.

The StabSlab™ is composed of layers of a cork rubber compound that allows knives to slide into the slab and store without touching another blade, in a smaller amount of space than any other knife storage system.

Of course, it keeps all the blades away from inadvertent skin contact, preventing the consumer from cutting themselves while reaching for the right knife. It allows for easy visual identity of the knife, as opposed to knife blocks, which only let you see the handle.
