

Order the new Rotaire Dryline

To enable fitment of this hand made quality product to your ailer it is necessary to make a wide range of sizes. A little care at this stage saves a lot of problems later so please be patient. If in doubt, call us.

Please check if your ailer has a removable cap on the top of its central pole before ordering. This usually acts as a "cork" and can be easily prised out. If it does, choose the Dryline "Classic." If not, select the Dryline "Adagio". However, larger Hills ailers and most other ailers like Brabantia, Vileda and Leifheit can be converted to the Classic by means of a unique Rotadaptor, 3D printed, available at extra cost.

Please measure each side carefully before ordering.

Order online or call Rotaire on 01684 575156 once you have decided the required size. You can pay by card or send a cheque to complete your order. Your order will arrive within 2 weeks.

Calculating the size of your clothesline:

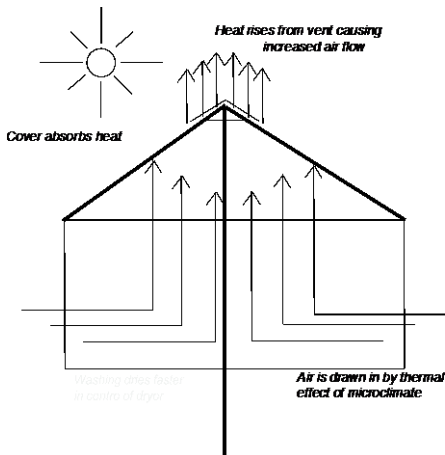

The most accurate way is to measure each side. Measure from the outside of the tip of one arm to the outside of the tip of the adjacent arm on each side. The lengths will probably vary - it's amazing we don't notice! If the length varies, take the average length and use it to work out the cover you need.

The Rotaire Dryline introduces a new approach to wash-day. Whatever the weather, this revolutionary product will improve your mood when it comes to drying your wet clothes. Not only will the Rotaire Dryline speed up the time it takes for your items to dry in summer, it also protects them from rainfall or bird-droppings, prevents UV bleaching of your clothes and will add to the life-expectancy of your ailer. The Dryline comes with a 12 month guarantee.

Rotaire
Dryline

Lots of benefits to the Rotaire Dryline such as –

ECONOMIC

Saves money
Saves time
No worries
Fast payback

No energy, clothes last longer
Faster to fit than to remove 1 wash load
Rain does not affect washing
Tumble dryer costs about €150/year

ENVIRONMENTAL

Green and environmental
Fits existing dryers
Cleaner clothes
Ultra-violet proof

Save up to 40 million tonnes CO2 in EU
No need to buy new hardware
No bird droppings
Prevents clothes bleaching

EFFICIENT

Speeds up drying
Long life product
Folds down when not needed
Easy access
Storage cover
Lightweight

Faster than airer alone in sunshine
Durable Polyethylene material
Fold down, push up action
Skirt lifts easily, rests on top
Protects Dryline when folded down
Easy handling and low cost

EXPERIMENTAL

Tried and tested
Unique and novel
Ethical
Ecological

Over 6,000 satisfied customers
International Patent cover in place
Developed by Green Party Councillor
Minimal packaging, energy efficient
