## FAQ

### Why use Coco Natural Air Freshener?

Many conventional air fresheners contain harmful chemicals such as formaldehyde, petrochemicals, p-dichlorobenzene and aerosol pollutants. We created Coco Natural Air Freshener as a safe and natural alternative.

### How long does it take for Coco to work?

It begins working immediately after you open the package. In just a few days, you will notice major improvements. Within a week, odors will be completely neutralized. For optimal results, we suggest to place Coco outside under direct sunlight at least one hour every month to "recharge". (reactivate the activated carbon).

### Is Coco Natural Air Freshener safe around pets?

Absolutely! Coco Natural Air Freshener contains only one ingredient – coconut shell activated carbon, which has no chemicals or toxins, making it safe to use around pets and children.

### How long will Coco Natural Air Freshener last?

Coco Natural Air Freshener will last at least one year with proper care.

### How do I take care of the product?

Place Coco outside under direct sunlight at least one hour every month for optimal performance.

### Can coconut shell activated carbon be recycled?

Of course! Coconut shell activated carbon is 100% natural. Remarkably, at the end of its lifespan, the coconut shell charcoal pieces from the product can be mixed with gardening soil. Charcoal pieces deter pests and absorb excessive moisture in the soil (ideal for delicate plants such as orchid).
