DISPLACES 30% LESS
CORK THAN ANY
OTHER CORKSCREW

LESS FRICTION

ERGONOMIC HANDLE
FITS SNUGLY IN PALM
AND FEELS GREAT

MAXIMIZES UPWARD FORCE,
REQUIRING LESS EFFORT THAN
A BASIC CORKSCREW

Frustrated with your corkscrew? Maybe that's because it was invented 400 years ago. It's time for a better one. Introducing THE Corkscrew, by CapaBunga.

The Corkscrew is designed for comfort and efficiency. The unique wedge shaped "worm" displaces 30% less cork, causing less friction and increasing upward lift, making it easier to pull the cork. The ergonomic handle also feels great in your palm, so opening wine has never been easier.

Finally, a MODERN corkscrew.

CHAMPAGNE STOPPER

KEEP YOUR BUBBLES FRESH FOR A WEEK
 TURN YOUR CHAMPAGNE BOTTLE
 INTO A SCREW CAP

- 1 OPEN YOUR FAVORITE BOTTLE OF SPARKLING WINE
- 2 UNSCREW CAP FROM BASE
- 3 SNAP BASE BELOW FLANGE
- 4 HOLDING THUMB TABS, SCREW CAP ONTO BASE

Fits most sparkling wine bottles

"I wish I had invented this!! Best closure for sparkling wines... period! Love the way the CapaBubbles keeps my sparkling wine fresh for days in our winery tasting room; at home, I love that I can open a bottle and just pour one glass, knowing that the wine will be in excellent condition days later"

- Kathleen Inman -Owner, Inman Family Wines, Russian River Valley, CA

CHEESE VAULT

ARTISAN CHEESE STORAGE

"The Cheese Vault is the ultimate home cheese storage unit – I store my cheese in it instead of using plastic wrap"

- Lynn Giacomini Stray, Owner, Point Reyes Farmstead, Point Reyes, CA

The Cheese Vault is a simple and reusable way to store your artisan cheese. Cheese experts agree that the worst possible way to store your cheese is the way we all do it – by wrapping it in plastic wrap. Cheese needs to “breathe” and eliminate excess moisture to maintain its flavor and delay molding just like in a cheese cave. Until now, the only recommended solution for proper cheese storage was to use disposable wrappers or bags.

Features and Benefits

- Made of food-grade silicone that imparts no flavors (size 6x4x3.5")
- Base is designed to wick away excess moisture thereby delaying mold
- The divider can be used to separate two smaller pieces of cheese, keeping each piece fresh and tasty without mingling flavors
- The two ends are polished so the name and date can be written with a ballpoint pen for easy identification then erased and reused
- Smells from the fridge do not impact the cheese inside, nor do the cheese aromas take over the fridge

KEEP YOUR ARTISAN BREAD FRESH

Whether you buy bread at your local bakery, the farmer's market or make it yourself, everyone wants to enjoy it after the first slice. The trick to keeping a crusty loaf fresh is to keep the moisture inside while allowing the crust to do its job of protecting the inside. If you leave the cut portion exposed, the bread will dry out. If you put it in a plastic bag, the crust becomes soggy. And never, ever store Artisan bread in the refrigerator as this is the fastest way to a tasteless, stale loaf.

With the BREAD CAP by CapaBunga®, you can extend the life of your favorite bread. The unique design allows the crust to "breathe" and protect the inside while simultaneously keeping the moisture from escaping through the cut portion. You no longer need a large bread box on your counter and you can keep plastic bags out of the landfill with the reusable BREAD CAP.

BC2

wine industry veterans

Husband and wife team, Walt Averill and Máire Murphy met through the wine industry where until 2011 they had spent their entire careers. After years of traveling the US, South America and Europe selling wine, they were exposed to a wide range of food and wine accessories. With a passion for wine and cooking, they realized that there had to be better solutions and CapaBunga was born!

When the first Capabunga prototype arrived, they realized after using it a few times themselves that every wine drinker had to have at least one! And from there, the business took off; first selling custom branded caps to the wine industry, and then, in January 2012 launching a consumer line featuring catchy slogans and graphics on brightly colored CapaBungas.

The reaction in the marketplace was overwhelming, and suddenly their customers were asking for new products. Given their extensive experience in the wine industry, they knew they had a unique perspective to develop products that eliminated the foibles of previous products. The line expanded from wine stoppers to champagne stoppers, wine glass identifiers, cheese storage, and artisan bread preservation. 2018 brings the launch of THE Corkscrew – a revolutionary new design on a product that has not changed in nearly 400 years.
