Al Dente

The PastaTimer for pasta with bite.

Al Dente looks like a Mafioso, but all he wants to do is to help. Originally he came from Italy, and brought cultural goods along. Once the pasta is al dente, he will sing Italian opera melodies. The PastaTimer will be plunged into the water together with the real pasta. Once the mafia-man shaped kitchen device gets into contact with boiling water, he will start an electronic pasta-cooking-program which will play three Verdi operas as soon as the pasta is perfect after 7, 9 and 11 minutes.
