About Ready for Sky

Our goal is to make home appliances “smart” and make the control process easy, convenient and safe for you.

Ready for Sky (R4S) creates the hardware platform and a wide range of the Internet devices. The company is included in an international group of companies for integrating Smart technology into household appliances.

Available on the
App Store
iOS 9.0 and higher

Android 4.3 and higher

Functionality of devices provided by the Ready for Sky technology

- Remote turning on/off
- Taking any readings (appliance condition, environmental condition)
- Operating schedule/timer
- Start of the built-in operating modes – apartment, cottage, balcony, etc.
- Special operating modes – child lock, power saving mode, etc.
- Monitoring of the devices operation – the frequency of use, the account of consumed power, the state of the motor resource, etc.

- Reminder about the maintenance (cleaning, replacement of consumables, etc.)
- Provision of extended electronic warranties for users, who connected their devices to the app
- The user notification about the necessity to order consumables for timely replacements (filters, lubricants, belts, anodes, etc.)
- Built-in recipe book for multicookers, kettles and coffee makers
- Start cooking directly from the recipe book in one click
- Food products ordering from the application

Smart Kitchen

Smart Electric Kettles SkyKettle

G200S, G201S

The new-generation smart kettle with original multi-colored lightning can be remotely controlled via smartphone.

By using the application Ready for Sky you can heat water to the desired temperature, adjust any color of the lighting and make the glass housing and the water shimmered with all the colors of the rainbow!

G210S, G211S

The application allows you to remotely start to boil water, adjust the heating temperature with the accuracy of 1°C and select the water boiling intensity to achieve the optimal salinity level. You can also set the illumination mode and color.

G230S

This kettle is equipped with a special inner flask for brewing herbal teas, making fondue, baby food and sport nutrition drinks. You can also make some sous vide dishes (in vacuum) using this kettle. Via the application you can also turn the kettle on/off, set a precise heating temperature, control the water boiling intensity and adjust flask color illumination.

M170S-E

The SkyKettle M170S is a smart kettle featuring remote control via a smartphone. Its mobile app settings feature an alarm for your convenience. A tea recipe book is also included as a bonus. Select the desired time for the water to be heated and set the ideal temperature you would like to brew your favorite kind of tea at with just one touch of your smartphone screen.

M171S

This device features cutting-edge remote control technology and combines the functions of a kettle and a thermo pot into one. You can switch the kettle on/off, select the heating temperature, adjust the time you would like the water to be heated for at the desired temperature.

M173S-E

With one touch of your smartphone screen you can remotely verify the current water temperature in the kettle, start water boiling or heating and enable or disable heating to the desired temperature. The application has a built-in alarm clock, which will help you to turn the kettle on right after you wake up.

Smart Coffee Machine
SkyCoffee

M1509S

This coffee maker features innovative technology for remote on and off switching. You can start the coffee-maker via your smartphone at any time that works for you and enjoy fresh brewed coffee without waiting. The heat-resistant 0.5 liter pot allows you to brew coffee for the whole family.

M1505S

This coffee maker with a built-in coffee grinder features Ready for Sky remote control technology. You can select the grinding time (up to 60 seconds), start the coffeemaking, and set the heating time of ready coffee for a period of up to 6 hours right.

M1507S

CM6632-SS

CM6638V

CM6632V

M1508S

The mobile app allows you to remotely turn the coffee machine on/off.

Smart Multicookers
SkyCooker

M800S

The smart multicooker can be controlled both using the panel on device and remotely. Remote-control cooking – run recipes from the smart-phone app. The R4S mobile app for remote multicooker control provides access to all the features of the device as well as the extensive cookbook and the calorie counter.

M92S

This smart multicooker can be controlled both using the panel on the appliance as well as remotely from anywhere in the world. The R4S mobile app provides access to all of the device's functions. The 3D-heating mode and a non-stick ceramic bowl coating allow you to cook with a minimum amount of oil and preserve a maximum quantity of vitamins and nutrients in the chosen dish.

M222S, M223S

Multi-functional multicooker with remote control and advanced features is an essential device for cooking healthy food for the whole family.

You can control 11 automatic programs both in the near-field and from anywhere in the world by using a free mobile application Ready for Sky.

M224S

SkyCocoon M224S is a unique multicooker with a remote control that works via the mobile Ready for Sky application on your smartphone. You can start the program from anywhere you like. It might be the same room or the other side of your town. Cooking was never easier – with a SkyCocoon you can start cooking in one click from the recipes book integrated into the app.

M40S

Via the application you can select an automatic program, set your own time and temperature settings, control the Reheat and Time Delay functions and start cooking directly from the built-in recipe book. In the M40S you can also cook sous-vide dishes.

M42S

The application allows you to run the multicooker remotely. You just need to select the program or set the cooking time and temperature. Via the smartphone you can control Reheat, Keep Warm and Time Delay functions. In M42S you can also make yogurt (6 jars are included in packaging) and sous-vide dishes (cooking in vacuum at a temperature of up to 70°C).

CBD100S

The smart multicooker allows you to cook in two bowls simultaneously or separately. Via the application you can select the program for each bowl, adjust your preferable time and temperature settings, set the Time Delay function and disable the Keep Warm function. The application has a built-in recipe book. Choose a recipe and start cooking in one click. In the CBD100S you can also cook sous-vide dishes.

CBF391S

This unique multikitchen features a heat modification element, distant remote control technology, and integrated radio tuner. All the multikitchen functions and programs can be run via the R4S mobile app. In addition, the app contains an extensive 100 recipe cookbook.

FM41S

In the FM41S you can lift the heating element and cook in a frying pan or in other heat-resistant utensils. All the programs operate independently no matter what the heating elements position is. Via the application you can set the automatic cooking program or adjust your own cooking temperature and time settings to cook, for example, sous-vide dishes (cooking under vacuum at a temperature up to 70°C).

Smart Multikitchens
SkyKitchen

Smart Thermopot
SkyThermopot M810S

You can select one of the 3 water heating modes on the control panel: 60°C, 90°C or 98°C. The mobile app allows you to adjust the temperature with 1°C accuracy. You can also block the control panel via the smartphone. Thermopot capacity is 5 L.

Smart Multibaker
SkyBaker RMB-M657/1S

More than 40 plates are designed for the smart multibaker. These plates allow you to cook various pastry and fried dishes. Via the integrated recipe book in the application you can start cooking in one click. The recipe book offers the choice of plate sets and ingredient filters. At the end of cooking the SkyBaker will disable the plates intensive heating automatically.

40 in 1

Smart Grill
SkyGrill RGM-M810S

You can start frying and baking in the smart grill via your smartphone. The app has a built-in recipe book created especially for the smart grill. You do not have to monitor the smart grill operation. At the end of the cooking process the plates intensive heating will automatically be disabled.

Smart Ovens **SkyOven**

5706S

In the app you can select one of the 16 automatic programs and start cooking from the built-in recipe book in one click. From your smartphone you can also increase/decrease cooking time and temperature and set the Keep Warm and Time Delay functions. The lower and upper heating elements of the smart oven can operate separately or simultaneously.

5707S

Smart Bread Maker **SkyBaker CBM1929S**

The app allows you to control the entire operation process of the smart breadmaker. Via the smartphone you can set the automatic program or your own time settings for dough kneading, laminating and baking from any distance. You can also control the Timer and Keep Warm functions, enable and disable audible signals. The application has a built-in recipe book where you can choose your favourite recipe and start cooking it in one click.

Smart Kitchen Scale **SkyScale 741S**

Modern kitchen scales with expanded functionality thanks to the R4S mobile app. When weighting the grocery of your choice, not only can you immediately view weight data down to the gram, but also the nutritional value and caloric content of the product as well.

Smart Home

Smart Irons Skylron

C250S, C254S

This remote controlled smart iron is safer than your everyday iron. The R4S technology allows you to see its operation status remotely, monitor the position of the iron (vertical, horizontal), and easily switch it off or block it from manual switching in case your kids or elderly people are left alone at home.

C255S, C265S

You can turn the smart iron off from your smartphone. The smartphone screen shows you the iron position as well: vertical, horizontal or sideways. Via the smartphone you can block the Skylron heating element. If the block is enabled the iron will not heat up when connected to a power supply.

Smart Heaters SkyHeat

C4519S

The app allows you to remotely turn the heater on, select the standard or turbo mode, set the operation timer and adjust the time delay function. You can also block the control panel via the smartphone. The smart heater has built-in motion detectors. The device can also be turned on automatically when a person or a pet enters the room.

C4522S

This smart heater featuring distant remote control and an improved safety system leaves behind all the other lower profile products. It also features intelligent heating, which can be automatically enabled if someone is present in the room.

4525S, 4526S, 4527S, 4528S

The mobile app allows you to remotely control the smart heater. Via the smartphone you can turn the device on/off, adjust the operation schedule for certain hours and week days. The heater is equipped with rolls for convenient moving. Heating area is up to 15 m² (models 4525S, 4527S) and 25 m² (models 4526S, 4528S).

7001S, 7002S, 7003S

The smart baseboard heater is installed on the wall and heats the floor. In this case, the wall functions as a thermal screen, which is uniformly heating the room. Via the application you can turn the convector on/off, select a power mode, schedule the heater operation and block the control panel. The length of the heaters: 7001S – 1040 mm, 7002S – 1540 mm, 7003S – 2040 mm. It suits most small rooms and stockrooms.

4550S, 4551S

The smart blow heater maintains an optimal temperature for your terrace, workshop or country house. Via the application you can remotely turn the blow heater on/off, set the timer and operation schedule for the repetitive heating of the cold space. Heating area is up to 20 m² for the blow heater 4550S and up to 30 m² for the 4551S. The blow heater can also be used for room ventilation.

Smart Water Heaters

SkyWaterHeat 302S, 502S, 802S, 1002S

Via the smartphone you can turn the smart water heater on/off and set its operation schedule. A "Vacation" function is available in the app. Now, you just need to enter the departure and arrival dates and the device will be disabled during your absence but will operate normally by your return. The tank capacity of the smart 302S is 30 L, 502S is 50 L, 802S is 80 L, 1002S is 100 L.

Smart Fan

SkyFan 5006S, 5005S

With the help of the Ready for Sky app on your smartphone, you can adjust the slope angle and rotation, set one of three speeds, and select an operation mode. The built-in thermometer immediately informs you of the temperature in the room.

Smart Purifier

SkyAirClean 3706S

The device sends out notifications of the air quality to your mobile device and you can start or end air purification, adjust the air flow rate and set a time switch just with the press of one button, ensuring that the air is already purified by the time you get back home.

3310S

This compact humidifier can be controlled via a mobile device. You have your choice between 4 operating modes, to switch on warm steam supply, or to adjust the comfortable humidity level or a timer right from a smartphone or a tablet screen.

Smart Humidifier

SkyDew 3313S

Smart Fan

SkyFan 5009S

Smart Window Cleaner

SkyWiper RW001

The Window cleaner will clean glass and mirror surface, windows, desk tops and many other surfaces. Your smartphone serves as a remote control. In the mobile application you can select one of the integrated motion modes and control the cleaning operation. The Window cleaner washes the surface of 1 m² in one minute without leaving any stains.

Smart Body Scale

SkyBalance 740S

These smart floor scales can measure body composition balance (bioelectrical impedance analysis, BIA) and save the data in the mobile Ready for Sky app. The app automatically creates graphs of weight variances and other BIA statistics for any period of time.

Smart Socket **SkyPlug 103S**

The Smart Socket Gateway is a multi-purpose gadget that allows you to control any electrical appliance from anywhere in the world. With the help of the mobile app, you can remotely switch on and switch off appliances, adjust a start timer, or set an operation schedule for a device.

Smart Gas Detector **SkyGas RSG-151S**

- Notification about gas leakage on your smartphone
- Indication of battery charge
- Temperature sensor
- Loud alarm

Smart leak detector **SkyWater RSO-81S**

- Online notification about water leakage
- Built-in temperature sensor
- Battery charge indication
- Sensor switch function

Smart Bulb Holder **SkySocket 202S**

This smart socket enables you to control lighting straight from your smartphone. You can enable or disable any lighting devices, adjust switch on/off scenarios, and check the operation status of smart plugs from anywhere in the world.

Smart smoke detector **SkySmoke RSS-61S**

- Notification about smoke
- Built-in temperature sensor
- Operating 20 m²
- Indication of battery charge

Smart opening sensor **SkyOpen RSO-31S**

- Security control in the house from your smartphone
- Online notification of the doors, windows, safe boxes opening
- Built-in temperature sensor
- Protection from unauthorized uninstallation
- Sensor switch function

IR remote controller
SkyControl RSC-21S

- Control of audio, video and climate devices
- Up to 20 saved remotes
- Adding new remote controls
- Audible and led indication

Smart climate station
SkyClimate RSC-51S

- Temperature sensor
- Humidity sensor
- Atmospheric pressure sensor
- Air pollution sensor
- Synchronization with REDMOND smart climate control appliances

Smart warm floor controller
SkyFloor RSF-171S

- Control of the electric and water warm floors, water heaters and radiators
- Internal and external temperature sensors
- Electricity consumption statistics
- Setting of the timetable
- Temperature range from -5 to +50°C
- Protection from children

Smart Control center
SkyCenter RSC-11S

- Gateway for Redmond Sky appliances control from anywhere across the world
- Bluetooth 4.0
- Wi-Fi
- Led indication
- Operation range up to 15 m
- Interaction with several users

Smart motion sensor
SkyMotion RSM-41S

- Operation range up to 12 m
- Viewing angle up to 120°
- Protection from unauthorized uninstallation
- Temperature sensor
- Detected movements statistics
- Interaction with others Ready for Sky devices

Sky Guard

REDMOND smart gadgets for home safety and security are available for the widest range of users without requiring any special skills for their installation and control. All you need to do to create the fully featured automation and control system is just install the Ready for Sky mobile application on your smartphone. Find out about any event that happens while you're gone in online mode and take action right away when necessary.

APPLICATION Ready for Sky Guard

- ✓ Easily control your entire home infrastructure via a single application
- ✓ Create connected systems and operation scenarios for Smart Home devices
- ✓ Unified security system

Smart Video Camera
SkyCam RG-C1S

- Online monitoring
- Smartphone photos saving
- Illumination at low light levels

Smart Smoke Detector
SkyGuard RSD-301S

- Smoke monitoring
- Audio signal injection
- Temperature sensor

Smart Outdoor Plug
SkySocket RSP-R2S

- Built-in body protecting against water penetration
- Electric appliances remote control
- Schedule timer setting
- Automatic appliances on/off switching modes

Smart Socket Gateway
SkySocket RSP-102S-E

- Hub for control devices around the world
- Electric appliances remote control

Smart Motion Sensor
SkyGuard RG-D31S

- Motion monitoring
- Temperature sensor
- Operating range 12 m
- Viewing angle 180°

Smart RF Socket
SkySocket RSP-R1S

- Remote control of appliances
- Setting a schedule, a timer
- Modes for automatic turning on/off the devices
