

Brief

Introduction

Hyflyer Innovations LLP

“I can, I will and I must.” – Harsh Shah

This thought strives our company to believe in ourselves and become a go getter. This ideology also makes us to develop and produce sustainable premium products with green technology. Our vision is to continuously create products that can revolutionize the stagnant thought process and positively impact people’s life. Our goal is to offer widest range of innovative products to automotive, electrical appliances, interiors and home furnishing industry. This makes us to continuously bring an edge to serve our customers with high quality standards and values. The reason for creating NANI was to bring a dynamic change in the durable market because we want our products to stand apart and make lives better for everyone. This process strives to create products which can become a part of your daily lives with innovation. The brand name also has an emotional attachment to it because it’s the name of our honorable director Mrs. Neeta Shah’s mother. This emotional attachment can be easily found in the products which helps to simplify the lives of the people and improve their standard of living.

About Nani

We at Nani believe in creating innovative household and kitchenware products at global scale. Having an engineering background continuously makes our company to think in various angles. This thought process strives us to create products which are unique, easy to use and affordable. We are an ISO 9001:2008 and ISO/TS 16949:2009 certified company which also gives us an edge when it comes to quality.

We believe to innovate products which are modern and have the capability to satisfy Indian needs. We as Indians love things which are easy to use, compact and affordable. This attitude drives our company to make things better and also to gel our culture with the world.

TRINO

Nani's Big Trino is India's 1st multi-functional cutlery (Spoon + Fork + Knife). It works as a spoon from one side and fork and knife on another side. The crisscross edges of the fork work as a knife. It's cost effective, light in weight, reusable, takes small place and compliments with other products.
