

# Swiss Diamond®

SWISS MADE NONSTICK COOKWARE

OUR NEW

## **XD** NONSTICK

Swiss Diamond **XD** is our latest, most advanced diamond-reinforced nonstick cookware line to date. XD is produced using a new coating formulation developed in our lab in Switzerland and an advanced production process pioneered in our manufacturing facility. The result is a significantly tougher cooking surface with even better food release properties.

- Made in Switzerland
- Cook without oil
- Eco-friendly production process
- Oven-safe up to 500°F (260°C).
- Tempered glass lids with adjustable steam vent
- Limited Lifetime Warranty

**Rivet-free cooking surface for maximum protection against bacteria.**

**Comfortable, ergonomic handles designed to stay cool on the stovetop. Oven safe to 500°F (260°C).**

**Brushed stainless steel flame guard.**

**Diamond reinforced nonstick surface (real diamonds in a high quality composite) provides years of trouble-free cooking and easy clean-up.**

**Extra thick, cast aluminum body with a perfectly flat base will not tip/spin or warp. Provides uniform heat distribution.**

## THE XD DIFFERENCE

Swiss Diamond **XD** is the result of many years of research and development. Swiss Diamond XD is a labor of love, produced using not only a new nonstick diamond-reinforced coating formulation but also an advanced production process.

### The **XD** Formula

- Swiss Diamond's XD nonstick coating contains 20% more real diamond crystals than HD.
- The coating material is engineered and manufactured exclusively at our facilities.

### The **XD** Process

- The new XD nonstick formula is prepared using an advanced mixing system for a more homogeneous solution.
- The advanced formula is applied using new proprietary technology.

### The **XD** Result

- Swiss Diamond XD features a significantly improved seal between the cooking surface and the aluminum base. This creates a tougher, more corrosion resistant layer for a 40% increase in durability over HD with 40% better food release.

## ENERGY EFFICIENT

Nothing conducts heat more quickly or efficiently than diamonds. Combined with a cast aluminum body, Swiss Diamond maximizes heat transfer to eliminate hot spots. Because it transfers heat so efficiently, you never need to use more than low-medium heat, reducing energy consumption.

## HEALTHY

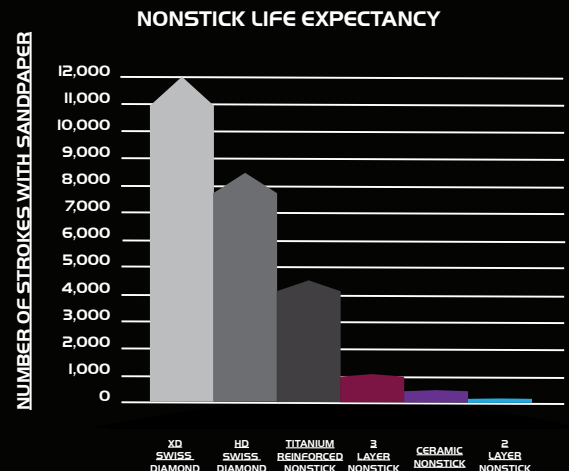

Designed for healthy convenience, Swiss Diamond allows cooking without oil, ideal for years of healthy eating.

Swiss Diamond is PFOA-free throughout the entire manufacturing process.

## SUPERIOR DURABILITY

In our lab tests, utilizing over 12,000 continuous strokes of coarse sandpaper, our diamond-reinforced coating outperformed the competition for years of trouble-free nonstick cooking and easy clean-up.

## RECOGNITION

- Gold Medal Winner  
(International Exhibition of Inventions)
- Best Nonstick Cookware  
(Leading U.S. consumer reporting organization)
- The Rolls-Royce of Nonstick Fry Pans  
(Wall Street Journal)
- American Vegetarian Association  
(Recommended for vegan/vegetarian cooking)
- Cooking Club of America  
(Recommended)
