

AD-230

# ESSENTIAL OIL DIFFUSER

## NO WATER NEEDED

### DESCRIPTION :

Place an essential oil bottle or pour some inside the glass cup holder to experience a concentrated aroma smell. It diffuses, using no water at all. Fill the air in your home or office with a long lasting fragrance. The temperature control helps accelerate the volatilization of essential oils without damaging the chemical components of oils. You can fill your room with a fragrance of your choice.

- Place entire 10ML or 15 ML bottle in the device, or pour some of an essential oil into the glass cup for a pure oil-only diffusion.
- Refreshes the quality of air we breathe
- Releases your favorite fragrance and with the help of essential oils it can lift your mood and reduce stress with the scented fresh air.
- Settings include continuous running or a timer mode that lets the unit run for 10 minutes followed by a 30 minute pause and back to a 10 minute operation again. This mode then continuously repeats itself.
