**SINCE 1936, SOLUTIONS FOR
TODAY'S CHALLENGES.**

Solid Fuel

Advantages:

- » Safest fuel source for cooking and emergency heating.
- » Lightest single meal stove + fuel available – as little as 1 oz. for stove plus fuel.
- » Safer to transport and easy to travel with.
- » Most space and weight-efficient cooking option available.
- » Great solution for freeze-dried meals, or a simple cup of tea or coffee.

Who should use:

- » Best fuel for emergency preparedness, used by NATO and armed forces worldwide.
- » Ultralight backpackers, bicycle touring, etc.
- » Multi-day trekkers who are weight-focused and want to carry less.

Alcohol

Advantages:

- » Cheapest fuel for camping use – as little as \$0.12 per meal.
- » Most commonly available fuel, with fuel available in almost every town.
- » Stoves are more reliable than pressurized gas and will not jam or clog.
- » Fuel stores in the stove so separate storage not required.
- » Much less waste, no need to carry or dispose of canisters.

Who should use:

- » Backpackers, anyone who doesn't want to carry old canisters of gas.
- » Cost-conscious car, tent, or RV campers.
- » Environmentally-conscious outdoor enthusiasts.

Fuel Type	Cost/Meal*	Carry-Out Waste	Boil Time, 16 oz.	Key Benefits
Alcohol	\$0.12	None	6 minutes	Cheapest cost/meal, easy to find in stores, widely available.
Solid Fuel	\$0.50	Some packaging	8 minutes	Lightest weight, safest to transport.
Butane	\$0.40	Cans	2-3 minutes	Lights quickly except at high altitudes.
Propane	\$0.25	Large cans	4 minutes	Burns hottest.
White Gas	\$0.25	None	5 minutes	Available in many hardware stores.

*Cost based on online fuel prices at Amazon.com as of 11/26/12, and were calculated using published burn times of stoves listed there for 0.5 l water, or a standard freeze dried meal.
