

7 reasons why Thumper® Massagers are better

1. Thumpers® are percussive.

Thumpers offer steady, comfortable pulsations that penetrate through all muscle layers, releasing tension and fatigue in even the thickest muscles. Thumpers do not vibrate.

2. Thumpers are direct drive.

The energy of the motor is sent efficiently and directly into the muscle you wish to massage. You will not feel your whole body "shaking" while using Thumper Massagers.

3. Thumpers are dynamically balanced.

The massage energy does not "creep" back to the handle or casing of the massager. No kickback to your hands or casing.

4. Thumpers are strong.

No mistaking these models with Far East imports. Thumpers are reliable, built to last and sustain professional use.

5. Thumpers offer a deep tissue massage with no work.

Typical vibrators skim over the skin surface and require added pressure to get deeper. Thumper's perpendicular "up & down" action travels into the muscle 1/4 inch deep, between 20 and 40 times a second, depending on the speed selected. This pulsed acu-pressure or tapotment is diminished if extra pressure is applied to the massager. Just "Park it". Thumpers do the work not you.

6. Thumpers are precision built in Canada.

Developed by professionals who know and understand massage. With thirty years of massage manufacturing experience, we offer 2 years warranty. All our units are assembled by hand and tested thoroughly before leaving our factory.

7. Thumpers work well on both thick and thin muscles.

Thumpers are fully adjustable to the person or body part you wish to massage.

thumper® is the original

Thumper Massager designed and patented the original deep muscle percussion massager in 1974. After more than 30 years in the business, all Thumper models for worldwide use are still meticulously handmade in Toronto, Canada. There is no other massager that comes close to the effectiveness and quality of the deep muscle percussion offered by Thumper Massager. Over 200,000 professionals worldwide use Thumper brand massagers, many of whom use the same unit throughout their entire career.

life enhancing benefits of massage

- Improved muscle tone
- Relaxation of the nervous system
- Better overall function of glands, organs, muscles and joints

what people say about thumper®

"Since I purchased my Thumper Massager my life has radically changed ... I believe that this machine has literally saved my life more than once. Using my Thumper every day reduces my pain greatly and gives me so much more mobility. What an amazing blessing this Thumper Massager is!"

– **Sapphire Moon, Hawaii, USA**

"We are incredibly impressed with the Thumper Mini Pro 2 build quality, whisper quiet sound, electronic speed/load controller and most of all the true percussive action ... For the past four years, not knowing any better, we've been using a knock-off product at home, and it is clear that you get what you pay for."

– **Ronald Mar, Toronto, Canada**

massagers with muscle®

maxi pro

professional massager

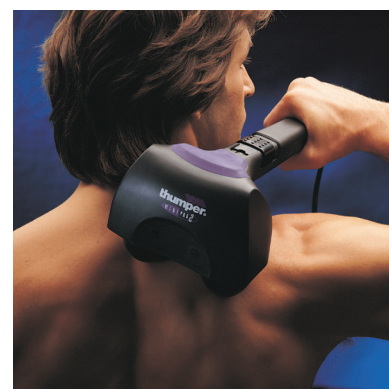

Top choice among Chiropractors and Therapists worldwide for over 30 years! Thumper Maxi Pro is the original deep muscle percussion massager. With eight massage spheres, variable power and weighing 7lbs., the Maxi Pro easily penetrates the thickest muscles, delivering a full-body massage in 5-8 minutes, with virtually no effort.

mini pro 2

professional portable massager

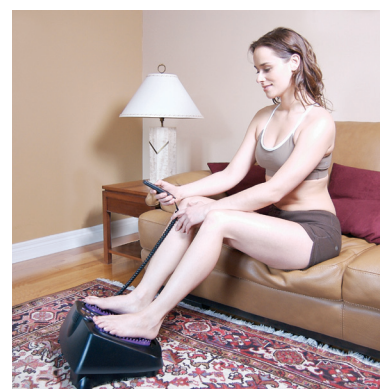

Number one choice among Professional Athletes and Trainers. The Mini Pro 2 is a professional strength massager in a personal, portable size. With two massage spheres and weighing only 3lbs., Thumper Mini Pro 2 delivers the strongest and deepest percussive massage available in a self-use model. Three electronically controlled power settings allow the user to adjust the massage for thin and thick muscle groups.

versa pro

lower body massager

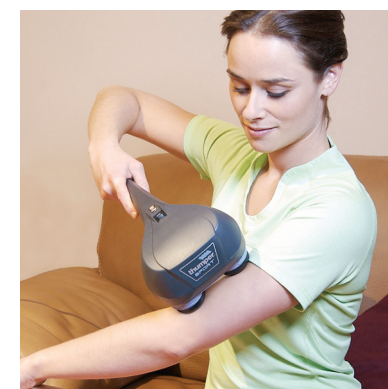

Rated the best lower body massager in the world. The Versa Pro is ideal for runners and people who spend long hours on their feet. It is a must for individuals seeking to improve blood flow and circulation in their bodies. The Versa Pro is a perfect complement to a fitness and wellness program. With six speeds, seven pre-programmed workouts and 184 acu-pressure nodes, the Thumper Versa Pro is specifically designed to massage feet, calves, hamstrings, and lower back muscles.

thumper sport

personal massager

Thumper Sport is a conveniently priced, portable, 'feel good' massager, designed specifically for home use. It was developed for active individuals who need to relax their muscles after exercise and for those who don't get enough exercise and need to improve circulation in their bodies. It is ergonomically designed for easy self-use and comes with two sets of massage spheres to customize your massage. Weighing only 3lbs., it is ideal for the office, gym, home or anywhere you can plug it in.

equine pro

horse massager

The Equine Pro is the preferred choice for world-renowned equine teams. It is used throughout the world to massage dressage, racing, and show horses. Its added power of percussive action is ideal for treating large and deep muscle tissue. This massager offers a Ground Fault Protection device so that it may be used outdoors.
