All Modularack® wine racks are made in Australia for a very good reason. It's the strong, hard, high-density wood from plantation-grown Australian Radiata Pine

that makes these racks very special.

Radiata pine originates from the California Monterey pine tree (*Pinus radiata*). The story is quite paradoxical. Monterey pine has an extremely limited natural habitat in only three localities on the California central coast, largely on the Monterey Peninsula. In its native habitat, it has little economic importance. Conversely, this same tree species

has been planted more abundantly throughout the world than any other American tree where it has great economic importance. Therein lies the paradox.

Monterey pine has been grandly successful in Australia, where the Monterey legacy wine rack wood is grown and the racks are produced. This modern Monterey pine, called Radiata pine in Australia (it's Latin name), has gone through selective breeding to produce superior trees with very straight, tall trunks. The result: a hard, high-density, strong wood.

All Modularack® products are made from FSC® certified timber.
