

Husky central vacuum systems are internationally renowned for their quality, performance and durability and have been for over 45 years.

Husky offers the broadest selection of central vacuum systems on the market, including dry hybrid models (with or without filtration bag), wet & dry models and the Husky PRO models, which may clean, vacuum and dry in a single step.

HUSKY 

CENTRAL VACUUM SYSTEMS

*Add value to any
Eco-Friendly
home project!*

www.huskyvac.com

SUSTAINABLE DEVELOPMENT IS ABOUT MEETING THE NEEDS OF TODAY
WITHOUT COMPROMISING THE NEEDS OF FUTURE GENERATIONS.

HERE ARE 3 REASONS WHY HUSKY WILL ADD
VALUE TO ANY **ECO-FRIENDLY** PROJECT:

- BREATHE CLEANER AIR IN YOUR HOME**
A cleaner home is the foundation to healthier living. A Husky central vacuum system will remove dust, allergens and other pollutants away from the living area more efficiently and with less noise than your regular portable vacuum.
Fact: Equipped with the Hepa air exhaust filter, the Husky central vacuum removes 99.97 % of particles that have a size of 0.3 µm or larger.*
- CONSUME LESS, CONSUME BETTER**
Husky central vacuum systems are 5 to 10 times more powerful than a portable vacuum cleaner. This means you create energy savings by cleaning more efficiently in less time! Moreover, Husky products are built-to-last! With proper care and upkeep, a Husky central vacuum will last a lifetime.
Fact: In average, a portable vacuum cleaner will be replaced every 5 to 8 years, all ending in garbage dumps.
- LOWER ENVIRONMENTAL IMPACT**
Husky vacuums are mainly made of recycled steel and aluminium, 2 of the most recycled materials in the world, decreasing environmental damage caused by mining.
Fact: Recycling steel and aluminium uses 95 % less energy than manufacturing them from new materials.

* **DUAL FUNCTION HEPA
AIR EXHAUST FILTER**

• Also acts as a muffler which reduces noise at exhaust.

Product Features

- This compact yet powerful unit is so quiet it may be used at anytime even if installed in a living area.
- High efficiency 12 litre Husky disposable filtration bag easily accessible by removing the cover of the power unit.
- All-metal construction with high-end finish for more durability.
- 10 year warranty on all components of the power unit including 5 years on labor.

- Hybrid system: May be used with or without a high efficiency Husky disposable filtration bag.
- 21.1 litre ultralight brushed aluminium canister.
- Machine-washable filter with Silpure antibacterial treatment for odor prevention and superior air quality.
- Intelligent module with LED status light and integrated instructions.
- All-metal construction with high-end finish for more durability.
- 25 year warranty on all components of the power unit including 5 years on labor.

Technical Specifications

Model number	ECO-130I-UK-H	FLX-260I-UK-EH
Electrical requirements	220-240 V, 1429 W, 6.3 A	220-240 V, 1690 W, 7.0 A
Maximum AirWatts	502	580
Maximum vacuum	3061 mm H ₂ O	3472 mm H ₂ O
Maximum airflow	56.2 l/s	59.5 l/s
