

# utiliTEA

by adagio teas

- variable-temperature electric kettle
- multiple settings for all tea varieties
- ETL certified

[adagioXL.com](http://adagioXL.com)

UtiliTEA is an electric kettle with variable temperature control. **Unlike other kettles that can only boil water, utiliTEA offers a gamut of temperature settings, making it ideal for the preparation of green tea, which is best brewed with cooler water.** Its powerful 1500-watt heating element boils water in under five minutes. However, the kettle won't

overboil — it automatically shuts off upon reaching the desired temperature. The stainless steel body sits atop a power base, allowing for cordless mobility. Makes 4 cups.

adagio teas

Adagio teas is an award-winning purveyor of gourmet teas and accessories, offering hundreds of exotic tea varieties in loose, bagged and RTD form, as well as many unique, imaginative teaware items. Simply tell us what you aim to accomplish — we are sure to propose a solution ideally suited for your business.
