

iRobot® Roomba® 780

Product Features

3-Stage Cleaning with AeroVac™ Series 2 – Roomba® 780 picks up an amazing amount of dirt, pet hair and other debris with its patented 3-stage cleaning system. A spinning side brush cleans along wall edges, counter-rotating brushes act like a dustpan and broom, and a powerful AeroVac™ Series 2 vacuum pulls dirt, hair, and debris off the brushes to the back of the bin. Roomba 780 uses a new advanced cleaning head which provides superior performance for picking up pet hair, dirt, dust and more.

Dual HEPA Air Filters – Roomba 780's dual HEPA filters trap dust, allergens and tiny particulates leaving behind fresh, clean air.

Dirt Detect™ Series 2 with Persistent Pass – Dirt Detect™ Series 2 allows Roomba 780 to clean the way you do. Sensors acoustically find dirt and other debris and optically locate pet hair so Roomba can perform concentrated cleaning on the dirtiest areas with a Persistent Pass cleaning pattern. Persistent Pass uses a back-and-forth cleaning motion that mimics the way you vacuum, yielding the cleanest possible results.

Room-to-Room Navigation – Roomba 780 methodically cleans multiple rooms, one room at a time. The included Virtual Wall® Lighthouses™ confine the robot to one room and, when it is thoroughly cleaned, automatically guide it to the next.

Touchpad control - The state-of-the-art touchpad eliminates buttons, giving you control at the touch of your fingertips and making Roomba 780 fast and easy use.
