TAO clean
THE ART OF CLEAN

Now you can benefit the technology and innovation of TAO clean using your favorite toothbrush. Germ Shield UV Sanitizer is an all-in-one solution for sanitizing your toothbrush, regardless of size or type, manual or powered. Just open the door, place the brush within the Germ Shield, shut the door, and voila! Germ-oblivion!

The gentle curves of the Germ Shield protect and enclose your toothbrush head from bathroom contaminants. Inside the Germ Shield exists the powerful Halo UV-C sterilizer lamp of germ destroying light that bathes all sides of the toothbrush head in pathogen blasting UV rays. It kills 99.9+% of bugs such as Staph, e-coli, and the common cold to sanitize the brush head. Germs are obliterated, albeit calmly and quietly with a cool blue light. In 4 minutes, once the cleaning cycle finishes, you're sanitized and ready to go. Conveniently sized, Germ Shield won't take up much space on your vanity.
As it's battery-powered, there are no messy cords to tangle.

Don't turn your toothbrush into an ugly Biology experiment. Germ Shield is part of a healthy home, which means all-round protection for your family.
