⚠ Cautions

The temperature of warm water released from this showerhead will be approx. 6 degrees lower than the set temperature because the water contains a lot of air.
Please set a temperature a little higher than your normal comfort level and check the temperature before stepping into the shower.

Penetrate through the stratum corneum and deep clean your pores.

Make bubbles in water as small as nanobubbles whose size are no greater than 1.0μm (Approx. 1/1000 of a millimeter)! These nanobubbles can penetrate through your pores, and helps increase cleaning and moisturizing power.
