HIGHWAVE®

SPRING 2019

simple tools for life.

Highwave has been a leader in building innovative products for more than 3 decades. We use sustainable materials, produce in ethical factories, and model our innovations with the perspective of tools for life. All of our designs are original with over 40 patents nationwide. The intersection of innovation and sustainability is Highwave.

COFFEE
& TEA

EARTHLID™

INNOVATION

100 billion polystyrene coffee lids landed in oceans & landfills last year. The Earthlid™ upgrades a paper coffee cup to eliminate one plastic lid for every coffee you drink! The ergonomic lid cools a "too hot" coffee fast and the strap seals for transport.

FUN FACT

Two people using the Earthlid™ can eliminate 700 toxic lids in one year. Earthlid™ fits on regular size soda cups to keep straws out of the ocean. Switch the strap colors for multi-color lids.

Seafoam	Ocean Blue	Cool Gray	Cranberry
ER1001	ER1002	ER1007	ER1008

Earthlid™

Fits on most paper cups

ROAM

Meet the Roam, a new 17 oz / 500 ml Design. The easy to grip top makes the Roam 100% leak-tight to ride in your car holder, empty through security and full of coffee in your backpack while boarding. The full vacuum vessel is now ready for a long flight. Features include slim profile to fit anywhere and intuitive no look push button drinking which allows you take a sip without demanding attention. The perfect companion when you travel domestic or international.

This award winning design started the buzz as the first drinking tumbler with a vacuum body and safe 360 degree drinking. The easy center push button open or close manages your drink to keep it hot for hours on end. With the final top, the JOEmo is completely leak tight. The patented ergonomic design fits everywhere. This one will be by your side forever. Keeps liquids hot for over 6 hours, and cold for 12 hours.

BrewFISH STAINLESS

INNOVATION

Catch the perfect cup of press coffee or tea! This total infusion single brew and drink design is vacuum insulated with 360 degree drinking. BREWFISH also prevents sediment & shuts off the brewing when pressed so it's never bitter. The last sip is hot and as good as the first!

FUN FACT

Cup a day habit? Switching from a paper cup to the BrewFISH will save about 23 lbs of waste per year.

The Brewfish is a unique press, the fish like filter swims circles around all others. Full infusion is best for coffee and tea leaves, most all would agree. The seals have a lot more room to seal so you have no sediment. The flapper valve shuts off all the brewing when you finish pressing to enjoy a perfect cup with a 360-degree drink top. The double wall glass can be microwaved and the double wall keeps it hot to the last sediment free sip. Silicone wide base swims over any creative desktop. All feature the original single wall drinking with the double wall function and dishwasher safe.

The Grate Grind is the modern Mortar & Pestle. The porcelain grooves grind spices with a twist and a foodsafe cutting board pestle. No-slip base to bump and grind garlic, ginger, nutmeg and even coffee beans.
Create and serve hummus, salsa, and guacamole. Grind coffee beans when the power goes out, add spices to make a tea blend. Or turn human food into dog food. It has a USA made bottom pad and is dishwasher safe.

Handmade double-wall borosilicate glass keeps your beer or spirits cold without condensation. Our orginal designs all feature structural aspects to ensure a long life.

jobeer

for every party, and the morning after

The joBEER is a multi-use system for a dynamic lifestyle.
Enjoy 18oz of your favorite brew in the cup, and secretly stash a full shot of your signature-dance-move-inducing tequila in the base. Or keep that brew nice and cold by freezing water in the same shot glass in the bottom compartment. The beer now retains its same perfect "first sip" chill to the very last sip guaranteed for two beers in a row. With Jobeer turn any three 12 oz beers perfectly into two 18 oz. beers, a good idea as any real beer drinker would agree. The ribbed body keeps it cool with a coffee "to go" in morning. With it's own silicone top.

TC750

Our Time Capsule keeps your water cold for hours and even holds a bottle of wine. This was the very first design in the market for that function. Sleek and sturdy, it comes equipped with a removable strap handle and a carabiner. You'll love the feel of the super soft rubber coating on the color bottles. The double wall vacuum will keep your drink hot or cold for 8-16 hours with no sweat.

APOLLO

still cold when you get to the moon

The Apollo was designed to be very ice friendly with a wide mouth with a stainless double wall lid, so no plastic ever touches your drink and your liquid is insulated from top to bottom. The double wall vacuum carries the capacity of a wine bottle. Comes with a removable strap that is carabiner friendly. The two colors are extra durable and the stainless is clear coated. Liquid stays hot or cold for 8-16 hours.

splash ring

for slobbering dogs, camp site water bowl or a H20 treat for a horse

This silicone ring easily attaches and is leak-tight on the bowl rim and a great accessory for camping with the hound. When you pour water into it, the water will not drain. Unscrew the top to drain into bottle. Use the velcro strap on a tree or camp chair for stabilization. Great for big dogs or a treat for horses! Easily snaps on the rim of your Dog Mug to control splash with a messy big dog in the car.
