

# bruno

pretty. smart.

bruno and its patents pending technologies have been many months in the making. The powerful vortex vacuum feature will deliver every dog hair, cheerio and grain of dirt directly into the trash bag. Just place the broom in front of the vacuum inlet to start the powerful vortex suction and Bruno will do the rest.

Bruno will also remind you to take the trash out on trash day, and alert you when you are low on bruno bags (a fancy way of saying trash bags).

## INTEGRATED VACUUM INLET

Cleaning up has never been easier! Sweep pet hair, dirt, dust and food crumbs into the integrated vacuum inlet and bruno's powerful vortex suction will automatically deposit debris directly into the trash bag. No more dustpans or bending over!

## HANDS FREE LID

bruno is clean, beautiful and simple. bruno can be opened hands free - even when yours aren't. Simply motion your hands across the top to open the stainless lid.

## BUILT IN CHARGING AND FILTER

A small flip of a secondary lid gives you access to the built-in charging and filtration area.

## TRASH BAG STORAGE POD

No fuss, no muss of trash in the trash can because someone forgot to replace the trash bag. Trash bags are stored right where you want them, when you need them. bruno's custom bags will fit perfectly and can be stored within hands reach. bruno also accepts standard 13 gallon kitchen trash bags.
